

Milwaukie's Local Leaders

Neighbor helps nab car thief

The car parked at an awkward angle at the end of Sheryl Marthaller's block just struck her as odd. Especially when she drove by and noticed the driver was slumped down behind the wheel.

Not sure if the man was napping or injured, she decided to call 9-1-1 to play it on the safe side.

The worst thing that could have happened was someone was going to get woken from a nap, the best thing, well, (the Police) wound up catching a burglar.

It turns out that when Milwaukie Police arrived at the scene and ran the vehicle's license plate, the car came back as stolen. Four officers approached the vehicle, and found the

Sheryl Marthaller

man was unconscious. Police transported him to the hospital, and after learning he had three different warrants for his arrest, all relating to burglary, police arrested the man.

Sheryl thinks that being familiar with her neighbors helped her identify a suspicious situation, and helped police catch a criminal.

I know the neighbors and their cars and we all kinda watch out for one another, Sheryl said. ☐

Transit Center timeline set

A timeline has been set for Milwaukie's new transit center and it calls for the demolition of the old Safeway building to take place early in the summer of 2001, and for the construction of the new transit center to begin later that same year.

But in between then and now, there are some steps that still need to be taken.

First, the City needs to complete the environmental impact study it's currently working on in order to free the federal funding that has been allocated for the project.

The City then needs to purchase the property and undergo the local land use procedures. Plans will be available for public review, and two different public hearings will be held this fall and winter. The cost of the Transit Center project

Please see **Transit Center** on page 4

Flood Plains vital part of Milwaukie's ecology

Did you know that Milwaukie has over eight miles of waterfront? That's what you would come up with if you measured the banks of the Willamette River, Kellogg Lake, Johnson, Kellogg and Mt. Scott Creeks.

Milwaukie's water resources are an important part of the City's past and will be just as important to its future. Rivers and creeks have a special relationship with the lands that surround them, many

of which are flood plains. Over time this relationship is growing even more crucial for flood protection and environmental conservation.

While we may not always notice it, flood plains are essential components to our public safety and the health of the City's water resources. They can provide needed habitat, forage, and corridors for fish, birds and mammals. An additional benefit of floodplains is that

they help spread floodwaters, which reduces the risk of injury and property damage. With proper management, flood plains can help improve the City's natural resources and protect against flood damage. But if flood plains are not managed properly, environmental resources can be damaged and the risk of flooding can actually increase.

For more than twenty years the City

Please see **Flood Plains** on page 4

Tree committee takes shape

While City Council was still considering the number of members that will sit on the Urban Forestry Ad Hoc Committee at the time of print, the committee's timeline and charge statement were fairly well defined.

At the June 5, 2000 Work Session Planning Director Alice Rouyer suggested to Council that the ad hoc committee should principally focus on the regulation of tree cutting on public property, the protection of tree resources

on private property including possible incentive-based programs, and the protection of significant, historical trees.

City Staff also recommended that six to 10 members serve on the committee, and that the time commitment should be no longer than four months.

The ad hoc committee meetings were suggested to begin in late September, and to conclude by the end of January 2001.

Please see **Trees** on page 4

Open Houses examine proposed zoning changes

On May 31 Milwaukie Staff and the consultants that have been working on the Downtown and Riverfront Plan, Crandall and Arambula, held two Open Houses in the Masonic Lodge that displayed the zoning changes and development standards that will make the plan less of an ideal, and more of a reality.

Five new zones have been proposed for the Downtown and Riverfront and each call for a different use that when combined together, will create the vibrant city core the Plan envisions.

The **Downtown Storefront Zone (DS)** is established to preserve and enhance the commercial Main Street character of Downtown. The ideal development is constructed next to the right of way, features retail or commercial uses on the bottom floors, and office or residential uses on upper floors.

The **Downtown Commercial Zone (DC)** is established to allow auto-accommodating commercial development in the area between McLoughlin Boulevard and Main Street, to the north of

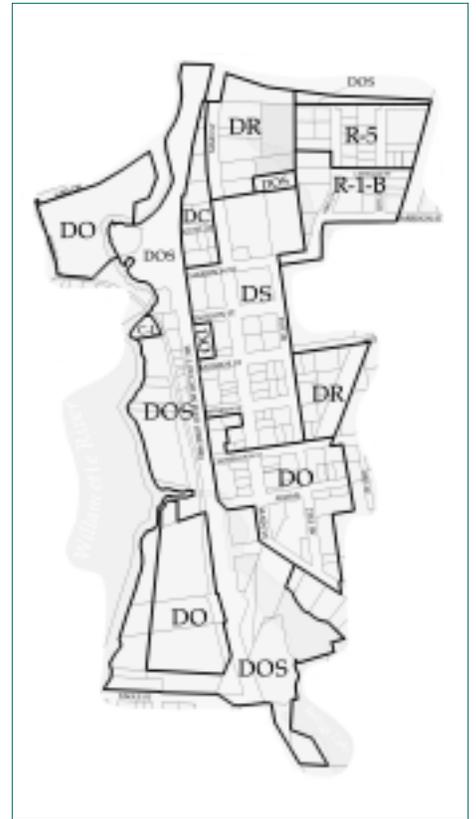

Harrison Street. Retail, service, office and residential uses are permitted to support a transition to higher densities.

The **Downtown Office Zone (DO)** is established to provide for office, entertainment and hotel uses along high visibility arterial streets.

The **Downtown Residential Zone (DR)** is established to increase housing opportunities in close proximity to downtown shopping, transit and open space amenities. The major types of housing will be apartments and condominiums, some of which could be four to seven stories tall.

And the **Downtown Open Space Zone (DOS)** is established to implement the open space, park and riverfront components of the Downtown and Riverfront Plan.

These zoning proposals were reviewed by the Planning Commission in late June. The results of their recommendation were not known at the time of print. Council's public hearing will be on August 29, 2000 at 6 p.m. in City Hall. For more information call 786-7699. ☐

City Manager introduces Storm Water employee

Written by *Dan Bartlett*, City Manager

Every so often we like to introduce one of the City's employees to the community they serve. The idea is to put names with faces, to attach some personality to the folks who work behind the scenes and help make the City function. This month we introduce Kenny Hill, who works in Public Works Storm Water Department. Kenny's a life-

Storm Water Utility Worker Kenny Hill. Kenny has been with the City four years.

time Oregonian, and lives with his wife, Kara, and seven-year-old daughter Tahila in Lake Oswego.

Q. How long have you been with the City?

A. Gosh, four years now. I started off in the Streets Department, and then went to Sewer and then to Storm. The only Department I haven't worked for is Water.

Q. What are your primary responsibilities?

A. My main job is keeping the storm system operating efficiently.

Q. And how would you describe the storm system?

A. All surface water collects into dry wells, and then gets moved throughout the City into another dry well or back into the Earth.

Q. What happens if the Storm system should fail?

A. Then you get (water) back up, floods

and damage to people's homes and property.

Q. What's the best part of your job?

A. I just like everybody, I like the people, I like my job as a whole. We have a lot of interaction with the citizens and I like to be the hero, the guy that saves the day. A guy called the other day with a puddle in the front of his house and we came out and fixed it the next day.

Q. What's the toughest part?

A. I don't think there is a toughest.

Q. It seems that summer would be the best time to be out and working.

A. Summer is the best. You have the opportunity to do more capital improvement projects in the summer.

In the winter, when it's raining more often, there's a lot more going wrong. There's a lot less problems during the summer. ☐

Municipal Code is now on line

The Milwaukie Municipal Code is available on the Internet and is accessible to any resident or interested person using a standard web browser. City Council puts a high value on communication with its citizens, and Records and Information Management (RIM) believes this will provide a very useful tool to a segment of Milwaukie's population.

The on-line code is in no way intended to replace one-on-one communications between citizens and staff but rather act as an enhancement to our current services at a relatively small expense. With this addition, the City codes will be available to the public both electronically and in hard copy.

To look at the code, go to www.bpcnet.com and click on on-line codes. You will see a menu of states and behind that a list of cities. Once a user has gotten to the Milwaukie code, they'll have the ability to conduct a full-text search, meaning residents only have to type the key words they're interested in to find the section of code they're looking to access.

City Staff is currently exploring the costs of codifying the Zoning Ordinance and/or Comprehensive Plan. Neither of these documents has been codified previously, and staff believes having them accessible on the Internet could benefit the community greatly.

The initial, one time setup fee was \$250, and the annual storage fee will be \$500. Supplements are billed on a per page basis, so costs will fluctuate. ☐

Ledding Library busy in July

Snakes and Magicians will be among the hundreds of patrons that visit Milwaukie's Ledding Library in the month of July.

On Monday, July 10 Bob Eaton will wow kids with his slight of hand and quick wit, and Jeremy Bollinger will do the same on Monday, July 31. Both shows will begin at 2 p.m. in the children's department. The shows are recommended for children ages six and older.

And then on Thursday, July 27 at 2 p.m. snakes will be slithering through Ledding's Scott Park when Reptile Man returns to Milwaukie to showcase his reptile friends.

There are even more programs offered for children in the month of July. Call the library at 786-7580 for details about our alien astronaut craft, snow globe galaxy, talking animal stories, weekly story times, or alien costume party. ☐

Sun shines on Cherry Festival

There was a little bit for everyone at this year's Milwaukie Bing Cherry Festival.

Hundreds of festival-goers enjoyed the parade, carnival rides, artisan displays, drama performances and the hot and sunny weather.

Congratulations to the Lewelling Neighborhood Association for winning the Parade's best float award in the noncommercial division, and hats off to all who represented their Neighborhood.

The Island Station Neighborhood came out in force for the Parade

Milwaukie Floral's float won top honors in the Festival's parade

The Farmer's Market was its usual hit during the Festival

Police bust fraud ring - offer tips of protection

Written by Larry Kanzler, Chief of Police

On June 1, 2000 the Milwaukie Police Department received information about the unauthorized use of credit card numbers. Detectives investigated and developed information that resulted in the service of two search warrants in the City of Milwaukie. The charges: fraud and theft - here's what happened.

At least six people working together obtained hundreds of credit card and checking account numbers by sifting

through the garbage of both businesses and private homes. These numbers were then used to order equipment over the Internet, resulting in thousands of dollars worth of fraudulent credit card and checking account bills.

Milwaukie detectives identified two of the suspects, served the warrants and recovered thousands of dollars worth of fraudulently obtained property.

But unfortunately, this is in no way an isolated incident. We need your help! Please don't throw credit card statements or receipts into the garbage. If you no longer need the credit card statement or receipt, destroy it by shredding, burning, or cutting into small pieces before they go into the garbage.

For more information on this and other crime prevention tips call the Police Department at 786-7400. ☐

Park legally and avoid the boot

Milwaukie Police have been giving blatant parking violators the boot lately, and Sergeant Terry Marthaller says it's to encourage parking compliance and to keep the parking spaces in front of Downtown businesses available for patrons.

The boot is an immobilization device that's clamped on to the front tire of automobiles that have been tagged with five or more unpaid parking tick-

ets.

Officer Marthaller explains that vehicles that camp out in Downtown spaces for more than the allotted time hurt businesses because those automobiles are occupying spots that could be used by paying customers.

When a vehicle is tagged with its fifth outstanding parking violation, the Police department sends the registered owner a letter alerting them that their car will be immobilized if it is found parked in the City.

Owners then have 11 days after the letter has been sent to pay the tickets.

But if the tickets go unpaid, and the vehicle is found, it will get the boot, and the owner won't be able to get it off until they pay their fines, and an officer removes the boot. ☐

Keep signs off of Right of Way

As the weather improves more and more signs start springing up around town. Some advertise garage sales, endorse political candidates or advertise real estate, but it's important that all of these signs stay out of the right of way.

And that's because temporary signs placed in the right of way interfere with traffic flow and hinder visibility. As a result, sign ordinances have been established. Here are some helpful reminders concerning the proper placement of signs.

- Signs placed on private property can't be any larger than 4 foot by 4 foot.
- Temporary signs cannot be permanently installed or illuminated, and should be posted for only short periods of time.
- Temporary signs also cannot be placed in the public right of way or in the right of way that crosses private property.
- And finally, signs cannot be placed on power poles, utility poles, or traffic control poles or signs.

A good way to identify the right of way is to find the imaginary line that's created by property owners' front-yard fences.

Trees from page 1

Staff will work to solicit interested people for the Council to interview for appointment, and has suggested that members could include a representative from the Planning Commission, Parks and Recreation Board, School District, Neighborhood Association, former Tree Committee or Portland General Electric.

If you're interested in serving on the Urban Forestry Ad Hoc Committee, please call 786-7502. ☐

Becoming involved with the Urban Forestry Ad Hoc Committee isn't the only way citizens can get involved with their government. The City is currently looking for candidates to fill the following positions:

- Milwaukie Center/Community Advisory Board
- Citizens Utility Advisory Board
- Historic Resources commission
- Library Board
- Parks and Recreation Board
- Planning Commission
- Traffic Safety Board

Those interested are asked to call City Recorder Pat DuVal at 786-7502.

For a complete list of the requirements and responsibilities of each of these positions, you can pick up an informational pamphlet at City Hall, or call 786-7503 to get a hold of Information Specialist Grady Wheeler, and he'll send you a copy.

Transit Center from page 1

has been set at about \$4 million.

With the new transit center in place, there will be better bus connectivity, buses will have less of an impact on Main Street traffic, Scott Park will have greater visual access and therefore greater security and a host of sidewalk and street improvements will be implemented. Be-

cause construction will begin next summer, the transit center project will be the first example of development governed by the standards prescribed by the Downtown and Riverfront Plan. Sidewalks, street trees, benches and lights will represent what the Plan seeks to encourage. ☐

Flood Plains from page 1

has been helping to balance construction in floodplains with protection against flood damage. Development must be flood proofed under the City's flood hazard regulations. Since 1994, environmental concerns of development located in floodplains have been addressed through City review of development proposals. Over the years the City's regulations have helped make flood plains safer while enhancing their natural values.

Milwaukie's floodplains are facing increased pressure. The City's creeks are now being looked at to help restore endangered fish. And as more development encroaches the creek's watersheds, the risk of flooding may increase. The City is looking into these issues, and will be developing plans that address these concerns in the near future. Look for future updates in your Pilot. ☐

AROUND TOWN

HISTORIC MILWAUKIE

Written by Ed Zurmwalt, Historic Milwaukie Chair

NEXT MEETING S INFO:

When: July 13, 7 p.m.

Where: Milwaukie Elementary (outside)

At our June 8 meeting Lynn Allmeyer, Director of Resource Development for Annie Ross House addressed us on the many services the organization provides

for the homeless as they go through the difficult transition from the edge of despair to a chance at a life with hope and self-esteem.

The breadth of services provided by Annie Ross House is amazing, and the struggle to give a hand up to people down on their luck is truly inspirational.

If readers would like to know more about the organization, or to help in any way, please call Lyn at 655-4134. Also,

I'm sure he would be available to address any organization interested in getting further information.

Another guest, Susan Finch of Metro, addressed us on the South Corridor Study on Transportation Alternatives, a study designed to develop, evaluate and prioritize not-Light Rail Transportation Options that are responsive to community needs and travel demands.

The South Corridor consists of Oregon City, Gladstone and Milwaukie,

the Clackamas Regional Center Area of unincorporated Clackamas County, and a section of Southeast Portland.

There are three citizen committees working on this project: Portland to Milwaukie; Milwaukie to Oregon City; and Milwaukie to the Clackamas area. At the present the committee's focus is on five main solutions: Commuter Rail, River Transit, High Occupancy Vehicle Lanes, Bus Rapid Transit and Bus-ways.

Each of the alternatives offers several positives and negatives, and the challenge is to sort through this myriad of options and arrive at a solution that will be both efficient and flexible, and still fall within manageable financial parameters.

It was interesting to note that only one of the committees, Portland to Milwaukie, has a desire to bring Light Rail to Milwaukie. If that were to happen, knowing Metros talent for creative financing, it would only be a short time before Light Rail was in every area of the County.

For further information on the study, contact Susan Finch at 797-1872.

Historic Milwaukie residents got into the spirit of Milwaukie's Bing Cherry Festival with their boat float.

ISLAND STATION

NEXT MEETING S INFO:

When: July 7, 6:30 p.m.

Where: Milwaukie Grange

It started with Island Station Chair Rick Farasy wanting to put together a clean up event for Elk Rock Island. By the time the event was held on May 20, 2000, Rick had rallied the help from area residents, the North Clackamas Park and Recreation District, Portland Parks and the organization known as Stop Oregon Litter and Vandalism (SOLV).

As Rick tells it, one phone call would lead to another helpful phone call, which would lead to another helpful phone call.

It really began with (Milwaukie Public Works Director) Sue Stepan, Rick said.

She's the one that helped me get the ball rolling.

The Parks District donated a dumpster and put the Neighborhood Association in touch with an Adopt a River program, SOLV donated collection bags, and Portland Parks donated volunteers and cop-

ies of the Elk Rock Island Master Plan.

By the end of the afternoon on May 20, volunteers had lifted an entire Dumpster's worth of debris and garbage from Elk Rock Island and the adjoining Spring Park.

Rick says that the first step the Elk Rock Island Master Plan prescribes is putting together a volunteer group that will prep the site for park development.

It's citizen involvement that's going to make the difference, he said.

Rick wanted to give special thanks to Thomas Kaffun from North Clackamas Parks, Steve Bricker of Portland Parks, and Dave Enbysk of SOLV.

Island Station's National Night Out celebration will be taking place on Aug. 1, 2000. The location was not yet known at the time of print, but live entertain-

ment was locked in for the event.

And finally, Rick encourages Island Station residents to attend the July 7 meeting so neighbors can develop a new slogan for the Island Station Neighborhood.

Don McCarty (from left), Steve Bricker, Jess Elizares, Bill Hupfer, Rick Farasy

AROUND TOWN

LAKE ROAD

Written by *Teresa Bresnaw*, Lake Road Chair

NEXT MEETING S INFO:

When: July 29, 7 p.m.
Where: Century Park

At our May meeting we got a new and valuable Cochair, the one and only former Milwaukie City Councilman Rob Kappa. We're also happy to have Susanna Pai remain as treasurer, because she's good at keeping track of the numbers and maintains organized records.

Debby Patten has agreed to remain secretary even though I offered her the Cochair position. We also had Kathy Wilke volunteer to do the phone calls as a reminder before the meetings. Our meetings are every other month with the parade, barbecue, and summer project taking up the summer months.

Speaking of our summer project, we've got a list of volunteers who have agreed to help Glorie Totten with some yard work. She's recently purchased a repossessed HUD home on 34th Avenue, which requires painting and a new roof. She has plans to do this herself with friends and relatives, but the yard is overgrown and needs lots of care. Glorie, being a single person and working a full time job, is appreciative of the hours we have spent so far.

Ron Silverman, who I must admit is better at weed eating than my husband is, did a great job at edging and whacking down the tall weeds in the backyard. Siri Bernard weeded along with Lisa (Glorie's roommate). Progress was made and we will have another crew of volunteers the next

time.

At last month's meeting we also agreed Lake Road needed some litter removal. So Diana Easley and myself spent an hour picking up enough garbage to fill two large bags. All of our labor at \$10 an hour goes toward matching our grant money so we can beautify Glorie's yard and maybe even some others.

We had a great turnout representing our neighborhood at the Milwaukie Bing Cherry Festival Parade. Thanks to Laura Cooper and the many others who helped organize our efforts. Community spirit seems to be prevalent here, which is what will give our kids all of these nice memories for being parade participants.

This year's Neighborhood barbecue has been set for Saturday, July 29th at Century Park, and will be even more fun this year because we have some new volunteers who are ready to bring some really fun and unusual games for attending kids and adults. The time is set for 1 p.m., and will end at approximately 4 p.m. See you all there!

ARDENWALD/JOHNSON CREEK

NEXT MEETING S INFO:

When: Meetings will resume in September

A resident of the Ardenwald/Johnson Creek Neighborhood for only a year and a half, the Neighborhood Association's newest chair has wasted little time getting involved in his community. Not only is Peter Koonce the new Neighborhood Chair, he's also a member of Milwaukie's Budget Committee and has attended dozens of other meetings and Open Houses that deal with the City's most pressing issues.

Peter says that being involved is something that was ingrained in him growing up, and has been a great way to meet people and to shape his Neighborhood.

Really enjoy having the opportunity to have a voice in the community, Peter said.

Peter hopes to attract even more

Neighborhood Association participation by continuing and building upon the Neighborhoods existing programs.

I think we tackle (low participation) by doing good things, by focusing on all of the positive things a neighborhood can accomplish, he said. Peter points to Ardenwald's cleanup events, Concerts in the Park series and summer Reading Program as examples of great community participation and great opportunities to reach more people.

Former Chair Darlene Walsh wanted to extend very special thanks to those who played such prominent roles while she was chair. She especially thanked Joe and Sherri Campbell, Phil Nelson, Jean Johnson, Lillie Moore and Peter Koonce.

The Ardenwald Neighborhood has a lot to look forward to this summer. First there's the reading program that will be held every Friday in July

Children at 1999's reading program at Ardenwald Park on Roswell Street. Children will receive four free books and Neighborhood residents will read to the attending children. On August 1, 2000 Ardenwald will hold it's National Night Out celebration from 6 to 8 p.m. The location has been tentatively set for Lisacs Stoves. And finally, Ardenwald Park will be the site for the Concerts in the Park series which will be held the first four Thursday's in August. The shows will run from 7 to 9 p.m. Check future Pilots for band listings.

AROUND TOWN

LEWELLING

NEXT MEETING S INFO:

When: July 6, 7 p.m. (tentative)
Where: Lewelling Elementary Library

The Lewelling Neighborhood earned top honors for their float entry in this year's Milwaukie Bing Cherry Festival Parade. The Parade was held Saturday, June 17, 2000. Congratulations to all who played a role.

Looking ahead, the Lewelling Neighborhood is planning a fence building project for the month of July at the park near Willow and Stanley. The temporary fence will be removed and replaced with a better looking permanent fence, perhaps a split-rail fence. If you're interested in pitching in, contact Neighborhood Chair Art Ball at 786-4016.

July's meeting is tentatively scheduled for July 6, call Art for confirmation.

LINWOOD

NEXT MEETING S INFO:

When: Meetings will resume in September

Linwood Neighborhood Association's new chair, Dolly Macken Hambright, hasn't always been involved in civic affairs.

I used to think it was okay to leave things in the hands of others, but now I don't, Dolly said. Now I believe people need to get involved in their community, because if you don't, things can go sideways and you'll be wondering what happened.

Dolly has been a Milwaukie resident since 1978, and a member of the Linwood Neighborhood Association since its inception four years ago. Dolly was previously the Association's acting secretary.

Owner and operator of a residential rental property management firm, Dolly says her primary objective as Neighborhood Chair will be getting information

to the people of her neighborhood about prevalent City issues.

Indicative of this commitment, Linwood has submitted a Neighborhood Grant Application for a reader board that would be placed at Linwood Elementary. The sign would not only advertise Neighborhood Association events, but school, PTA and sports program information as well.

Dolly thinks that getting more information to the people of Linwood will help battle every Neighborhood Association's greatest challenge, and that's low turnout.

Getting more information to the people will help get people out to the meetings, Dolly said.

Even though Dolly has stepped up to become chair, the Linwood Neighborhood Association is still in great need of volunteers. There are currently vacancies for Linwood's Secretary, Treasurer and Vice Chair positions. Those that are interested are asked to call Dolly at 659-7582.

Furnberg Park Update

After several years of planning, the enhancement and restoration plan for Furnberg Park in the Linwood Neighborhood is expected to begin to be put in action by the middle of August.

A boardwalk will be constructed around the east side of the wetland so visitors will have an opportunity to better observe the wetland and all of its natural inhabitants. The boardwalk will incorporate an observation deck at the end of the walk.

And in order to complete the connection between the southern paved pathway and the east side boardwalk,

a paved sidewalk will be installed.

The construction is projected to be completed by Feb. 28, 2001.

Results from June 5 Poll Question

In June, we asked Milwaukie residents what streets and intersections in Milwaukie would they identify as the most congested. Here's what Milwaukie residents said:

7 Callers described the intersection near the Milwaukie Marketplace, (Oak Street and Highway 224)

6 Callers listed the intersection of Lake and Oatfield Roads

3 Callers named the intersection of 37th Avenue and Intrntl. Way

1 Vote for 34th Avenue and Lake Road
1 Vote for Oatfield Road and Park Avenue
1 Vote for Lake Road and Freeman Way
1 Vote for Harmony Road and Railroad
1 Vote for 42nd Avenue and King Road

Meeting Broadcast Information:
