RESOLUTION NUMBER 4-1926

"Whereas, The Oregon State Board of Health has requested the Mayor and Council of the Town of Milwaukie, Oregon to express their present intention in regard to future disposition of sewage for the said Town of Milwaukie.

BE IT RESOLVED that it is the present intention of the Mayor and Council of the Town of Milwaukie, Oregon, that the Town of Milwaukie, Oregon, shall employ any practical means in the disposal of its sewage, that shall be in general use by the Cities, Towns and private persons now disposing of their sewage in the Willamette River; and that the said Town of Milwaukie, Oregon shall join with other Cities, Towns and private persons in any practical plan to purify the Willamette River, by eliminating the dumping of untreated sewage therein.

BE IT FURTHER RESOLVED, That since the present character of the Willamette River, in regard to its impurity, is determined by the vast quantities of untreated sewage now deposited therein by Cities, Towns and private persons; and since a sewage treating plant for the small amount of sewage that is or can be deposited therein by the Town of Milwaukie, could serve no useful purpose, in that such a plant would not change the character of the river to any appreciable extent; that it is not the intention of the Town of Milwaukie, Oregon to install any sewage treating plant, until the other Cities, Towns and private persons, now depositing untreated sewage in the Willamette River, are willing and able to take similar steps.

BE IT FURTHER RESOLVED, That all sewers within the Town of Milwaukie, Oregon be so constructed that should any general steps for the purification of the Willamette River be taken; that a treating plant can be installed at a minimum expense and with slight interference with all sewers systems previously constructed.

BE IT FURTHER RESOLVED, That the sewer system now being installed within the Town of Milwaukie, Oregon is of such nature that a treating plant can be installed therein with practically no expense except the actual cost of such a plant and without in any way interfering with the present system.
