The City of Milwaukie provides a full range of municipal services to the community, including police protection, traffic control and improvement, street maintenance and improvement, water, wastewater, and surfacewater management services, planning and zoning regulation, building inspection and regulation, and community library services. This Master Fee Schedule consolidates all City fees and charges adopted by City Council resolution for the various services that the City provides. When a new fee is established by the City Manager it shall be incorporated into this document, and it shall be included and specified during the next update to this document. A waiver or reduction request must be in writing and communicated to Council to allow opportunity for comment. If the City Manager or his designee agrees to said waiver or reduction, he/she shall inform the City Council, in writing, of the request and his/her decision, except in minor matters (defined as waivers or reductions valued at \$1,000 or less).

GENERAL**Billable Hourly Rates**

Unless otherwise specified, the City employee billable hourly rate shall be calculated as 2.5 times step 4 of the employee's job classification, to the nearest \$5 increment. This calculation shall be used to recover costs for those services billed on an hourly basis, including but not limited to professional services such as planning, engineering, public works, utility, financial, legal, and police services. The use of a multiplier of 2.5 is intended to recover all overhead, training, benefits, and other costs associated with a City employee's time. Any work performed during overtime hours shall be billed as the calculated hourly rate multiplied by 125 percent. A schedule of hourly billing rates will be maintained. The City Manager or individual department directors are authorized to adjust calculated billings to reflect the impact of unusual circumstances or situations.

Comparison Graph

This graph compares the average utility bills for the neighboring cities surrounding Milwaukie. As some cities bill monthly, some bill every two months, and some bill every three months, these amounts are converted to average monthly amounts so they are comparable to Milwaukie. Cities increase different rates at different times during the year; therefore, this graph is simply a picture in time reflecting the rates when the survey was conducted. Cities have different average water consumption amounts per household; so for the sake of this comparison, these rates are computed using an average 6ccfs of water used per month to be comparable to Milwaukie's overall average. Below are Milwaukie's calculations:
