

# International Way Project

## Milwaukie Street Surface Maintenance Program

ENGINEERING DEPARTMENT - PROJECT MANAGER JASON RICE - 503-786-7605

In 2006 City Council enacted the Street Surface Maintenance Program (SSMP) to collect funding to help keep the City's major arterials in decent condition. This being one of the City's arterial streets, this was selected as an SSMP project.

The repaving of International Way between 37th Avenue and Harmony Road is planned for June.

The City of Milwaukie is sending businesses in the project area to provide notice of this work, and to provide a contact person at the City to be in communications with, as this work will cause traffic delays, and impact on-street parking and business access.

### DESCRIPTION OF WORK

For the section between 37th Avenue and Freeman Way, contractors will grind away four inches of the road surface within the travel lanes. Areas where the roadway's base has failed will be reconstructed prior to repaving.

Between Freeman and Harmony, damaged base will be repaired and measures will be made to prevent future cracking and the entire paved surface will receive a new two and a half inch overlay. The City will ensure that driveways within this section will be tied in properly.

### TIME FRAME

City Council approved the contract for this project at its Regular Session Meeting on May 15, 2012. The City is forecasting the contractor to begin work in mid-June, and the work to last about three weeks.

### TRAFFIC, PARKING & ACCESS IMPACTS

Between 37th Avenue and Freeman Way two lanes of traffic will be maintained at all times.

Because there is no turn lane in the stretch between Freeman Way and Harmony Road, traffic will need to be reduced to one lane of traffic and will be managed by flaggers.

During the period of construction on-street parking on International Way between 37th Avenue and Harmony Road will not be available. The City recognizes this will be a considerable inconvenience and will work to complete the work as soon as possible.

For those businesses with single access points, access may be closed for up to 20 minutes at a time. A single access point will be maintained at businesses with multiple access points. Construction should move rapidly through the project area with the aim of directly impacting individual businesses for limited periods of time.

Now that the contract has been awarded, the City will be working with the contractor in the coming weeks to reduce these impacts as much as possible.

### CONTACT

Weekly construction updates will be posted on the City's website at [www.cityofmilwaukie.org](http://www.cityofmilwaukie.org), under the Projects tab.

If you have questions or concerns about the nature of work, or how this project may impact business operations, please contact City of Milwaukie Civil Engineer Jason Rice.
