

## About the Project

ODOT is designing a project to improve safety through the design and construction of compliant ADA ramps, pavement and bridge preservation on this 3-mile stretch of OR 224 (Milwaukie Expressway).

## Key Elements & Benefits

- Safety improvements such as curb ramps, push buttons, bike detectors and intersection changes at Monroe Street will increase safety and accessibility for pedestrians and people biking.
- Updated signs, striping and guardrails will improve safety and increase visibility.
- New pavement will be smoother and extend the highway's lifespan.

## Schedule

Project design continues through fall 2024. Construction is scheduled to begin in 2025.
