Residential Solar Installation Form

This form has been developed in order to make prescriptive residential solar installations as simple and affordable as possible. This form may only be used for residential roof-mounted solar PV installations meeting the prescriptive requirements of the Oregon Solar Installation Specialty Code (OSISC).

Building Permit No. ____________

Residential Roof Mounted Solar Photovoltaic System Installation Certification Form

Project Address: ____________________________________________________________

Representing: ___________________________________________________________, Oregon CCB No. ____________

Company Name

I certify that the installation at the above address complies with the prescriptive requirements of Section 305.4 of the Oregon Solar Installation Specialty Code [OSISC]. I understand that all other provisions of the Code must be complied with.

1. The system is installed on a roof of metal, single layer wood shingle or shake, or not more than two layers of composition roofing.
2. The combined weight of the PV modules and racking does not exceed 4.5 pounds per square foot, and the maximum module height does not exceed 18” from the top of the module to the roof surface, and does not extend above the highest ridgeline of the building.
3. The roof support is either:
   - Manufactured trusses; maximum 24” on center spacing.
   - Wood rafters complying with Table 305.4.1 or 305.4.2 of the OSISC:

<table>
<thead>
<tr>
<th>Material</th>
<th>Span</th>
<th>Size</th>
<th>Spacing [24” max.]</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

4. The method of attachment meets the requirements of Section 305.4 [Item 3].

5. The installation is not on a building currently listed in the City’s Historic Resources Properties List.

In addition, I am providing the following information:

- Listing information, showing compliance with UL 1703.
- A sketch clearly showing the size and location of the installation, roof slope and Fire Fighter Access and Escape provisions [OSISC Section 304.9].

I understand that the following is also required:

- A separate electrical permit and inspections.
- A final building inspection. I understand that I may be required to provide additional information as a result of this inspection, and a re-inspection fee may be assessed for any required re-inspection. **Someone will be required to meet the building inspector at the site and provide a step ladder or other means to access the attic area.**
