

## SE 22<sup>ND</sup> AVENUE AND RIVER ROAD IMPROVEMENTS

Safe Access for Everyone (SAFE) is the City of Milwaukie’s program to improve safety for people walking, biking and more. SAFE calls for upgrading our network of connections such as sidewalks, ramps, and crossings to fill network gaps, replace portions that don’t meet American Disability Act (ADA) standards, and remove barriers for people to safely get where they need to go.

As part of this program, we will be making several updates to SE 22nd Avenue and River Road, between McLoughlin Boulevard and Sparrow Street, including:

- **Constructing sidewalks and ADA accessible curb ramps**
- **Adding new crosswalk markings and bike symbols** in bike lanes
- **Repaving both streets** for a smoother surface
- **Removing a water pressure control vault** at SE Sparrow Street and replacing it at SE Wren Street

These improvements will increase safety and improve walkability of the neighborhood. It will also be easier to access TriMet’s bus lines 33 and 34, the Milwaukie Main Street Max Station and the nearby Trolley Trail.

### Timeline

Design of this project is just getting started. Crew members have started surveying the area to better understand the site conditions. The design phase will last through early 2020, with construction anticipated to begin next summer.

There will be several opportunities for neighbors to learn more about the project. A neighborhood meeting and project tour will be held later this summer. Keep your eyes peeled for a Save the Date notice!
