Milwaukie, OR 97206

Milwaukie High School
Historic Resource Review Application

Dear Denny,

This office represents the North Clackamas School District. This letter has been prepared in order to request an amendment to the City's Comprehensive Plan Map and Zoning Map to delete the Milwaukie High School from the City's Inventory of Historic Resources. In 2016, the District passed a Bond Measure to allow for the funding of new facilities and infrastructure throughout the District. The replacement and modernization of Milwaukie High School was included among the list of bond-funded projects and the removal of the existing main building on campus from the City's Historic Resource Inventory is the first step towards the construction of a new high school.

The Applicant has prepared the attached materials to formally request an Historic Resource Review to delete the property from the City's Inventory, and a Comprehensive Plan Map Amendment and Zoning Map Amendment. Within this document, the Applicant has identified and addressed the applicable approval criteria related to this request.

Please feel free to give me a call if you have any questions or need any additional clarification.

Sincerely,

Andrew Tull
Principal Planner
3J Consulting, Inc.

SITE INFORMATION	
Parcel Number:	11E36BC 5600
Address:	11200 SE 23 rd Avenue
Size:	14.7 acres
Zoning Designation:	R-2 and R-1-B
Existing Use:	Milwaukie High School
Street Functional Classifications:	SE Washington Street is classified as a collector. SE 23 rd Avenue, SE Willard Street and SE 25 th Avenue are classified as local roads.
Surrounding Zoning:	The properties to the south and east are zoned R-2. The properties to the west are zoned R-1-B and DMU. The properties to the north are zoned R-1-B and R-2.

APPLICANT'S REQUEST

The North Clackamas School District is proposing to construct a new high school on the existing Milwaukie High School Campus and seeks approval of an application for an Historic Resource Review to allow for the deletion of Milwaukie High School from the City's Historic Resource Inventory. This narrative has been prepared to describe the proposed development and to document compliance with the relevant sections of Milwaukie's Development Code.

SITE DESCRIPTION/SURROUNDING LAND USE

Milwaukie High School is located at 11300 SE 23rd Avenue within the City of Milwaukie. The site consists of one tax lot, 1S1E36BC 5600, which is traversed by SE Willard Road. The site is approximately 14.7 acres and is primarily zoned R-2, with a small portion of the site west of 23rd Avenue zoned R-1-B. The existing school consists of a primary academic and administrative building, with several connecting additions made to the campus over the years.

STATE HISTORIC PRESERVATION OFFICE PROCESS

Because the North Clackamas School District is a public agency, it is required to consult with the State Historic Preservation Office (SHPO) regarding the site's historic structures. The District is currently working towards a Memorandum of Agreement with the SHPO which will eventually implement several mitigation measures to be undertaken by the NCSO. The latest correspondence from the State indicates that mitigation will mostly likely need to include the following measures:

- State-level documentation including exterior and interior digital photography prior to demolition;
- Physical history and interpretation including interpretive displays and information to be located on campus;
- Digital research and interpretation including historic background and research materials available online; and
- Artifacts which will be salvaged and re-purposed from the old academic building.

The District is amenable to the points requested by the Historic Preservation Office and intends to continue working with the State to reach an agreement.

CHAPTER 19.400 OVERLAY ZONES AND SPECIAL AREAS

19.403 HISTORIC PRESERVATION OVERLAY ZONE HP

19.403.1 Purpose

The intent and purpose of this section is to promote the general welfare by providing for the identification, protection, enhancement, perpetuation, and use of sites, structures, districts, objects, and buildings within the City that reflect the City's unique architectural, archaeological, and historical heritage, and to facilitate preservation of such properties in order to:

- A. Safeguard the City's heritage as embodied and reflected in such resources;**
- B. Encourage public knowledge, understanding, and appreciation of the City's history and culture;**
- C. Foster community and neighborhood pride and sense of identity based on recognition and use of cultural resources;**

-
- D. Promote the enjoyment and use of cultural resources appropriate for the education and recreation of the people of the City;**
 - E. Preserve diverse and significant architectural styles reflecting phases of the City's history, and encourage complementary design and construction relative to cultural resources;**
 - F. Enhance property value and increase economic and financial benefits to the City and its residents;**
 - G. Identify and resolve conflicts between the preservation of cultural resources and alternative land uses;**
 - H. Integrate the management of cultural resources and relevant data into public and private land management and development processes; and**
 - I. Implement the goals and policies of the Comprehensive Plan.**

19.403.2 Applicability

- A. Section 19.403 shall apply to all historic resources within the City as identified in the Historic Resources Element of the Comprehensive Plan.**
- B. An historic resource may be designated HP on the Zoning Map and placed on the City historic and cultural resources inventory following the procedures of Subsection 19.403.4 of this section.**

Applicant's Facts and Findings: The City's Historic Resource Overlay applies to this site as the City's Comprehensive Plan lists the Milwaukie High School as a Significant Resource within the City's Historic Inventory under Appendix 1, also shown on Map 4.

19.403.4 Process for Designation or Deletion of a Landmark

- A. Application Request**

The owner of record, contract purchaser, or an agent of any of the foregoing, of property within the City may make application for resource designation or deletion. The application shall be in such form and detail as the Planning Director prescribes and processed per Section 19.1007 Type IV Review. The application shall be submitted to the Planning Director. The Planning Commission or the City Council may also initiate such proceedings on their own motion.
- B. Planning Commission**

The Commission shall conduct a public hearing to evaluate the request. The Commission shall enter findings and make a written recommendation to the City Council.
- C. City Council**

The City Council shall conduct a public hearing to consider the recommendation of the Planning Commission on the request and shall either approve, approve with conditions, or deny the request.

Applicant's Facts The Applicant has proposed to amend the City's Comprehensive Plan by

and Findings: removing the Milwaukie High School from the City's Historical Resource Inventory. The process for review of this application will include a review by the Planning Commission, resulting in a recommendation to the City Council. The Council will render a final decision on the combined application.

There are no approval criteria associated with a request to delist a Resource from the City's Inventory. The Applicant has addressed the City's Comprehensive Plan and Map Amendment criteria as a concurrent Amendment to the Comprehensive Plan has been requested. In the absence of criteria for approval, the City can approve the Applicant's request for delisting upon receipt of a formal request.

19.403.7 Demolition

A. Notification of Demolition Request

If an application is made for a building permit to demolish all or part of a designated cultural resource, to the extent that the historic designation is affected, the building official shall, within 7 days of the receipt of an application, transmit a copy of the application to the Commission. This review applies to all resources determined to be "significant" or "contributing" on the inventory. Resources determined to be "unrankable" shall first complete the process referred to in Subsection 19.403.4.

Applicant's Facts and Findings: The Applicant has proposed to remove the Milwaukie High School from the City's Historical Resource inventory and to delete the resource from the City's Comprehensive Plan Map. No formal request for a demolition permit has been submitted at this time. As a demolition permit has not been requested, the provisions of this section do not apply to this application.

Despite the fact that an application for demolition has not been filed, the Applicant has followed many of the provisions listed within this section which would require an owner's action in recognition of the fact that the Milwaukie High School is listed as an Historic Resource within the City. The following comments detail the steps which the District has undertaken to provide notice to the public of the planned demolition and replacement of the Milwaukie High School's main building.

B. Property Owner Action

For a period of not less than 30 days prior to the public hearing the property owner shall do as follows:

- 1. List the property for sale with a real estate agent for a period not less than 90 days with the intent of selling or relocating the resource intact. Such real estate agent shall advertise the property in local and state newspapers of general circulation in the area. This listing requirement can be reduced if the Commission approves the demolition request;**

Applicant's Facts The Milwaukie High School Building was listed for sale. The advertisement

and Findings: was also listed on the State’s Oregon Procurement Information Network – ORPIN, and in the Clackamas Review from July through August. No responses to the advertisement of the property’s removal were received by the district.

2. **Give public notice by posting a visible “For Sale” sign on the property which shall be in bold letters, no less than 6 in. in height, and shall read as a minimum: HISTORIC BUILDING FOR SALE—WILL BE DEMOLISHED UNLESS MOVED;**

Applicant’s Facts and Findings: In July, the Applicant posted a For Sale sign on the property. The sign met all of the dimensional criteria listed within this section. No responses to the advertisement of the property’s removal were received by the district.

3. **Prepare and make available any information related to the history and sales of the property to all individuals, organizations, and agencies who inquire.**

Applicant’s Facts and Findings: The Applicant received no inquiries about the property during the public advertisement period.

C. Public Hearing Review

The Commission shall hold a public hearing within 45 days of application. The procedures shall be the same as those in Section 19.1006 Type III Review.

Applicant’s Facts and Findings: The Applicant has applied for a Type V Application which seeks to amend the City’s Comprehensive Plan by deleting an Historic Resource from the City’s registry. As the Applicant has not yet applied to demolish the structure, the process for review of these applications will include a review by the Planning Commission which will result in a recommendation to the City Council. The Council will render a final decision on the Applications.

D. Review Criteria and Findings

In determining the appropriateness of the demolition, as proposed in an application for a building permit, the Commission shall consider the following:

1. **All plans, drawings and photographs as may be submitted by the applicant;**
2. **Information presented at a public hearing held concerning the proposed work;**
3. **The City Comprehensive Plan, including the economic, social, environmental and energy consequences;**
4. **The purpose as set forth in Subsection 19.403.1;**
5. **The criteria used, and findings and decisions made, in the original designation of the landmark or historic district in which the property under consideration is located;**
6. **The historical and architectural style, design, arrangement, materials, or its appurtenant fixtures; the relationship of such features to similar features of other**

- buildings within the district; and the position of the building or structure in relation to public rights-of-way and to other buildings and structures in the area;**
- 7. The effects of the proposed work upon the protection, enhancement, perpetuation, and use of the district which cause it to possess a special character or special historic or aesthetic interest or value;**
 - 8. Whether denial of the permit would involve substantial hardship to the applicant, and whether issuance of the permit would act to the substantial detriment of the public welfare and would be contrary to the intent and purposes of this title.**

Applicant's Facts and Findings: As described above, these criteria do not apply to this application because the Applicant has applied to delete a Historic Resource from the City's Inventory and not demolish a resource. Demolition of the structure will only occur after the request for delisting of the resource has been approved by the City.

Although these criteria do not apply, the Applicant has undertaken a long and thoughtful process to identify and evaluate options associated with the Milwaukie High School Building. The district has prepared several materials which demonstrate that the decision to request deletion of one of the Historic Resources from the Inventory and Comprehensive Plan Map has not been taken lightly. The following is a description of the District's process in arriving at the decision to demolish and replace the existing High School Building.

In November of 2016, the electorate passed a school bond to allow for district-wide construction, maintenance, and replacement of multiple facilities. The replacement or renovation of Milwaukie High School was listed as a high priority project. After passage of the bond, the District engaged DOWA-IBI Group to evaluate options associated with modernization of the existing building. The District also initiated a significant public outreach process which involved consultation and meetings with several recognized neighborhood associations, students, and the general public and discussed options for demolition, retention and replacement.

The District also engaged Peter Meier Architects (PMA), a professional architecture firm specializing in historic preservation and preservation planning to evaluate the potential for preservation of the existing building and to work with the State Historic Preservation Office (SHPO). PMA produced a SHPO Clearance Application which encapsulated the building's history and additions and which described the significant architectural features of the structure. The SHPO Clearance forms are located within Appendix D.

On June 27, the Applicant and the District met with members of the community at Milwaukie High School to discuss the plans for removal of the

existing building and to illustrate the conceptual plans for the new facilities. More than 400 mailed invitations were sent to neighbors residing within 400 feet of the property. Invitations were also mailed to members of the City's Planning Commission, Design and Landmarks Committee, and the City Council. At the June 27th meeting, the DOWA-IBI Group and the District presented the site's conceptual designs and discussed the project's timelines.

Although these criteria do not apply to this application, the Applicant has used these criteria as a guide in preparing to request the delisting of the resource from the City's inventory and the proposed Amendment to the Comprehensive Plan Map to remove the structure from the City's Historic Resource Inventory. The City can find that the Applicant has gone to great lengths to evaluate alternatives to delisting and to involve the public in the decision making process. Ultimately, the decision to demolish the existing Milwaukie High School building and to replace the structure with a new and modern high school will provide the best possible level of service to the District's students and the residents of Milwaukie.

The requirements of this section do not apply to this application; however, the District has followed these guidelines for demolition of an Historic Resource in recognition of building's status as a historic structure.

CHAPTER 19.900 LAND USE APPLICATIONS

19.902 AMENDMENTS TO MAPS AND ORDINANCES

19.902.1 Purpose

This section establishes the process for amending the City's Comprehensive Plan and land use regulations within the Milwaukie Municipal Code. The approval process related to Comprehensive Plan amendments is intended to ensure compliance with State laws and administrative rules, including the 19 Statewide Planning Goals and the Metro Urban Growth Management Functional Plan, Chapter 3.07, Title III of the Metro Code. The approval process related to land use amendments is intended to ensure compliance with the Comprehensive Plan.

The goals and policies of the Comprehensive Plan are implemented, in part, through the land use regulations of the Milwaukie Municipal Code. The sections of the Municipal Code that most directly relate to implementation of the Comprehensive Plan are Title 14 Signs, Title 17 Land Division, and Title 19 Zoning.

19.902.2 Applicability

The requirements of Section 19.902 apply to the amendments described below.

- A. Amendments to add, modify, or delete the text of the Milwaukie Comprehensive Plan or its ancillary documents.**
- B. Amendments to add, modify, or delete the text of Titles 14, 17, and 19 of the Milwaukie Municipal Code, or any other portion of the Milwaukie Municipal Code that constitutes a land use regulation per ORS 197.015.**

- C. Amendments to change the maps of the Milwaukie Comprehensive Plan, including maps within ancillary documents. Changes to these maps resulting from actions taken by Section 19.1104 Expedited Process are exempt from the requirements of Section 19.902.**
- D. Amendments to change the “Zoning Map of Milwaukie, Oregon,” which is the map established by Subsection 19.107.2. Changes to this map resulting from actions taken by Section 19.1104 Expedited Process are exempt from the requirements of Section 19.902.**

Applicant’s Facts and Findings: Milwaukie High School is listed as a significant property within the City’s Comprehensive Plan Appendix 1 - Historic Resources Property List, as well as Map 4 of the Comprehensive Plan. The Applicant has requested removal of the High School from the City’s Resource List and Map 4. The provisions of this section apply to the project because the Applicant has proposed a amendments to the City’s Comprehensive Plan Appendices.

19.902.3 Comprehensive Plan Text Amendments

Changes to the text of the Milwaukie Comprehensive Plan shall be called Comprehensive Plan text amendments.

A. Approval Criteria

Changes to the Milwaukie Comprehensive Plan may be approved if the following criteria are met:

- 1. The proposed amendment is consistent with the goals and policies of the Comprehensive Plan, as proposed to be amended.**

Applicant’s Facts and Findings: The City’s Comprehensive Plan addresses schools in the City’s Recreation and Intergovernmental Cooperation Objectives. The Plan mentions the need to support work with other governmental agencies towards the provision of publicly useable open spaces. The document references the fact that Milwaukie’s schools play an important role in providing open space within the community. The proposed relocation of a main building for a new high school on the grounds of the old school are consistent with the City’s Comprehensive Plan.

- 2. The proposed amendment is in the public interest with regard to neighborhood or community conditions.**

Applicant’s Facts and Findings: North Clackamas School District is pleased to be able to provide education for Milwaukie’s high school students near the center of Milwaukie’s downtown. Having students embedded near the urban center helps to ensure that students, parents, and administrators are integrated within the community. The proposed amendment enables improvements to the existing High School’s campus which are certainly in the best interest of the

public.

3. The public need is best satisfied by this particular proposed amendment.

Applicant's Facts and Findings: Prior to the replacement of an Historic Resource, an applicant must apply to delist the property from the City's Inventory. As alteration of the resource is required in order to continue the provision of services within the community, the public need is satisfied by the proposed amendment.

4. The proposed amendment is consistent with the Metro Urban Growth Management Functional Plan and relevant regional policies.

Applicant's Facts and Findings: Metro's Urban Growth Management Functional Plan calls for institutional uses, including schools, to be located within Centers, Corridors, Station Communities and Main Streets (3.07.640.b.2). The proposed amendment allows for the redevelopment of a site located within the Town Center and adjacent to a MAX Light Rail Station. The proposed amendment is consistent with Metro's Functional Plan.

5. The proposed amendment is consistent with relevant State statutes and administrative rules, including the Statewide Planning Goals and Transportation Planning Rule.

Applicant's Facts and Findings: The Oregon Statewide Planning Goals define schools as one of a series of Key Facilities which are primarily planned for by local governments. Key Facilities are described as being essential to the support of more intensive development. The Transportation Planning Rule (TPR) requires any property owner proposing a Comprehensive Plan Amendment or Zoning Map Amendment to assess whether the amendment will have a significant impact on the surrounding transportation network. As this Comprehensive Plan Map Amendment and Zoning Map Amendment application does not include a change of use, the reasonable worst case trip generation on the site has not changed and, therefore, the proposal is compliant with the TPR.

19.902.4 Comprehensive Plan Map Amendments

Changes to the maps of the Milwaukie Comprehensive Plan shall be called Comprehensive Plan map amendments.

A. Review Process

Changes to the maps of the Milwaukie Comprehensive Plan described in Subsection 19.902.2.C shall be evaluated through either a Type IV review, per Section 19.1007, or Type V review, per Section 19.1008. The City Attorney shall have the authority to determine the appropriate review process for each Comprehensive Plan map amendment. The City Attorney's review process determination is not a land use decision per ORS 197.015 and is not subject to appeal.

Generally, Comprehensive Plan map amendments that involve 5 or more properties or encompass more than 2 acres of land are legislative in nature and subject to Type V review. Comprehensive Plan map amendments that involve fewer properties and encompass a smaller area of land are quasi-judicial in nature and subject to Type IV review.

Applicant's Facts and Findings: The Applicant acknowledges the Type V process requirement.

B. Approval Criteria

Changes to the maps of the Milwaukie Comprehensive Plan shall be evaluated against the approval criteria in Subsection 19.902.3.B. A quasi-judicial map amendment shall be approved if these criteria are met. A legislative map amendment may be approved if these criteria are met.

Applicant's Facts and Findings: The Applicant has addressed the approval criteria in Subsection 19.902.3.B as it relates to the proposed Comprehensive Plan Map Amendment.

19.902.6 Zoning Map Amendments

Changes to the Zoning Map of Milwaukie, Oregon, shall be called Zoning Map amendments.

A. Review Process

Applicant's Facts and Findings: The Applicant acknowledges the Type V process requirement.

B. Approval Criteria

Changes to the Zoning Map shall be evaluated against the following approval criteria. A quasi-judicial map amendment shall be approved if the following criteria are met. A legislative map amendment may be approved if the following criteria are met:

- 1. The proposed amendment is compatible with the surrounding area based on the following factors:**
 - a. Site location and character of the area.**
 - b. Predominant land use pattern and density of the area.**
 - c. Expected changes in the development pattern for the area.**

Applicant's Facts and Findings: The proposed Zoning Map Amendment is necessary to allow for the deletion of a historic resource from the City's Inventory to provide for a modernized high school. The overall use of the site will remain the same, therefore the use is compatible with the surrounding area.

The requirements of this section have been met.

- 2. The need is demonstrated for uses allowed by the proposed amendment.**

Applicant's Facts and Findings: In November of 2016, the electorate passed a school bond to allow for district-wide construction, maintenance, and replacement of multiple facilities. The replacement or renovation of Milwaukie High School was listed as a high priority project. The proposed amendment is necessary to

allow for the deletion of a Historic Resource from the City's Inventory to construct a modernized high school, a need demonstrated by the electorate.

3. The availability is shown of suitable alternative areas with the same or similar zoning designation.

Applicant's Facts and Findings: A suitable alternative area is not applicable in a deletion of a historic resource from the City's Inventory, as the historic resource overlay zone is used selectively for specific structures.

4. The subject property and adjacent properties presently have adequate public transportation facilities, public utilities, and services to support the use(s) allowed by the proposed amendment, or such facilities, utilities, and services are proposed or required as a condition of approval for the proposed amendment.

Applicant's Facts and Findings: The existing high school has adequate public transportation facilities, public utilities, and services to support the school. The use of the site will remain the same, therefore adequate facilities exist to serve the new school.

5. The proposed amendment is consistent with the functional classification, capacity, and level of service of the transportation system. A transportation impact study may be required subject to the provisions of Chapter 19.700.

Applicant's Facts and Findings: The proposed deletion of a historic structure from the City's inventory will not impact the existing transportation system.

6. The proposed amendment is consistent with the goals and policies of the Comprehensive Plan, including the Land Use Map.

Applicant's Facts and Findings: The City's Comprehensive Plan addresses schools in the City's Recreation and Intergovernmental Cooperation Objectives. The Plan mentions the need to support work with other governmental agencies towards the provision of publicly useable open spaces. The document references the fact that Milwaukie's schools play an important role in providing open space within the community. The proposed relocation of a main building for a new high school on the grounds of the old school are consistent with the City's Comprehensive Plan.

7. The proposed amendment is consistent with the Metro Urban Growth Management Functional Plan and relevant regional policies.

Applicant's Facts and Findings: Metro's Urban Growth Management Functional Plan calls for institutional uses, including schools, to be located within Centers, Corridors, Station Communities and Main Streets (3.07.640.b.2). The proposed amendment allows for the redevelopment of a site located within the Town Center and

adjacent to a MAX Light Rail Station. The proposed amendment is consistent with Metro's Functional Plan.

8. The proposed amendment is consistent with relevant State statutes and administrative rules, including the Statewide Planning Goals and Transportation Planning Rule.

Applicant's Facts and Findings: The Oregon Statewide Planning Goals define schools as one of a series of Key Facilities which are primarily planned for by local governments. Key Facilities are described as being essential to the support of more intensive development. The Transportation Planning Rule (TPR) requires any property owner proposing a Comprehensive Plan Amendment or Zoning Map Amendment to assess whether the amendment will have a significant impact on the surrounding transportation network. As this Comprehensive Plan Amendment and Zoning Map Amendment application does not include a change of use, the reasonable worst case trip generation on the site has not changed and, therefore, the proposal is compliant with the TPR.

SUMMARY AND CONCLUSION

Based upon the materials submitted herein, the Applicant respectfully requests approval from the City Council of this Application for the deletion of Milwaukie High School from the City's Comprehensive Plan Inventory of Historic Resources. We trust that the materials submitted herewith document that the applicant has satisfied the burden of proof in illustrating that the City's standards and codes either have been met or can be met through conditions of approval.

CONTINUATION SHEET

- Include additional documentation for Section 4 or 5 as necessary. Attach maps, drawings, and reports as needed to illustrate current conditions and the planned project. If submitting this form by email, photos and maps may be inserted into continuation sheets.
- If completing a complete Determination of Eligibility (DOE) or Finding of Effect (FOE), use continuation sheets as necessary or include appendixes.

IDENTIFICATION AND DESCRIPTION OF THE HISTORIC RESOURCE:

Description:

The existing campus is 14.65 acres and is located in Young's Addition in SE Milwaukie, Oregon. Originally, 6 ½ acres were purchased on Young's Addition, Milwaukie. The high school takes up about 3 to 4 traditional city-blocks east to west and approximately 3 blocks north to south, although the campus itself has never had a traditional city grid. There is an area of residential houses on the eastern side of campus that fills the rest of the block and fronts SE 27th Avenue.

The campus lies at a close proximity to the northern end of Kellogg Creek where the creek flows into the Willamette River. The Milwaukie/Main St. MAX Station for the Orange Line is located directly west of campus on the other side of SE 21st Avenue, and the line runs northbound along the west side of campus. SE Washington Street and SE Willard Street serve as the campus' northern and southern boundaries as they run parallel to each other, and SE 21st Avenue marks the campus' western boundary. SE 23rd Avenue—a street that was vacated in 1985 through the approval of a conditional-use permit by the City—runs south to north along the west edge of the Commons building. It ends abruptly at the northern face of the Commons building and then begins again on the southern side of campus.

As it currently stands, the main academic building of the high school is three stories in height and faces west toward the J.C. Lillie Auditorium and Performing Arts Building. It is located on the southern side of campus with the auditorium to its northwest corner, the Commons and Arts & Crafts buildings to its north, and the athletic fields to its east. The gymnasium sits on the northern side of the Commons and Arts & Crafts/ boiler building. The band building was replaced

OREGON SHPO CLEARANCE FORM CONTINUATION SHEET

Do not use this form for ODOT, Federal Highway projects or to record archaeological sites

by a concrete block storage shed, and the Student Health and Wellness Center is at the southeastern corner of the Arts & Crafts/ boiler building. Please refer to *Views 7-10*.

Behind the front façade of the main building, there are three wings that extend laterally to the east. The front section of the building contains labs, classrooms, teacher resource rooms, the main entry and lobby space, and a production room on the first floor. Its second level contains more classrooms and offices, and another computer lab. The third level contains more classrooms and teacher resource rooms. The North Wing of the main building contains a game room and student resource center on the first floor, computer labs on the second floor, and a combined total of four classrooms split between the second and third floors. The central wing of the main building contains classrooms, an auxiliary space, and custodial rooms on the first floor. The second floor contains the library's media center and small classrooms, and is double-height as the central wing does not contain a third level. The south wing contains classrooms on the first and second floors, and specialized science classrooms on the third floor.

Significance:

Milwaukie High School is listed in the city of Milwaukie's Historic Resource Inventory as a "significant property." The school was inventoried in 1983, but has undergone additional changes since that time. The primary building and the original boiler room building still retain sufficient integrity to be potentially eligible for the National Register under criterion C, for their architectural merit. The gymnasium building, though originally constructed in 1938, has been so enlarged, encased, and altered as to be ineligible for historic listing. Other buildings on the campus were constructed less than 50 years ago and are therefore not considered historic (as of 2017). One of these newer structures does affect the setting and integrity of the primary building; the 1993 commons addition. This large new building volume was added at the northwest corner of the primary building, cutting off SE 23rd Avenue and creating a confusing campus layout which hides the original high school building from the major streets on the north.

The 1925 primary building's west-facing volume with central main entry retains much of its original exterior features and materials. The front entry bay was remodeled several times; most significantly in 1958 and in 2000. See *Views 5 and 7*. Despite these changes, this front "bar" volume has its original pattern of openings and decorative features in the Art Deco style. The interior retains its general central corridor layout with classrooms and primary stairs. In 2000, windows were all replaced from the original steel multi-pane windows of varying operation (fixed, hopper, casement) to aluminum windows with insulating glass and applied multi-pane divisions. Some windows may have been replaced prior to that date as well. In most cases, the drawings show a new aluminum frame encasing the original steel frame. The original auditorium volume in the center was radically altered in 1971 to become a media center. None of the interior is identifiable as the original stage & proscenium, raked seating and balcony, or other features. The 1938 north wing retains its original interior layout for the most part. The 1949 south wing also retains its original corridor layout, though the classrooms have been enlarged into what was initially corridor (2000).

The Arts & Crafts/ boiler building has been enlarged and altered significantly, but still retains original features such as the decorative chimney. The earliest, 1925 portion of the building is the square volume furthest to the west, which originally had only one chimney (see *View 2, Sanborn map*). The 1949 addition was larger than the original volume, and T-shaped in footprint. It added a second chimney attached to the first, which matches the first but lacks some of the finest-scale decorative embellishment. The Arts & Crafts/ boiler building has only fair integrity overall, but could be considered a contributing outbuilding to the primary school building.

OREGON SHPO CLEARANCE FORM CONTINUATION SHEET

Do not use this form for ODOT, Federal Highway projects or to record archaeological sites

View: Diagram of Historical Integrity illustrating major reconstructions (vs minor renovations)

Diagram notes: 1: Exterior façades maintain good to fair integrity. Interior has good integrity. 2: Wings have good exterior and interior integrity. 3: Central volume has fair integrity at exterior; poor integrity at interior. 4/5/6: Exteriors of Arts & Crafts/ boiler building have good to fair integrity, depending on the location and level of change. Interiors have fair integrity. The Health and Wellness Center area is contemporary. 7/8: Despite two facades of the gym having good integrity and the interior of this original volume (7) having fair integrity, it has been overwhelmed by the large additions surrounding it.

History and Context:

Milwaukie High School is one of only two schools listed on the city’s Historic Resource Inventory, and it is more than a decade older than the other, the 1937 Milwaukie Junior High Waldorf School. However, secondary education was in existence in Milwaukie long before the 1925 construction of the Milwaukie Union High School building. In 1907, classes were offered for the first time in a building located where the present Milwaukie City Hall stands. When the population of students had increased to 40 a few years later, the high school was accredited and students no longer had to travel to Oregon City or to Lincoln High School in Portland to earn a high school diploma. The first graduating class of the Milwaukie school held commencement on May 22, 1914.

OREGON SHPO CLEARANCE FORM CONTINUATION SHEET

Do not use this form for ODOT, Federal Highway projects or to record archaeological sites

By 1924, 976 students were split between the two school districts, Ardenwald and Milwaukie in school district no. 1, and there was a growing demand to build a fireproof, modern high school building in Milwaukie. The district spent \$12,000 on 6 ½ acres in Young's Addition in Milwaukie to build the new Union High School building in 1925.

Francis Marion Stokes, a prominent architect who designed many school buildings around the state, designed the new school. Stokes had attended the Oregon Agricultural College in Corvallis, Oregon, after which he took over his father's company Stokes & Zeller Co. in 1915. Although Richard Zeller appears to have left the firm in 1922, Stokes continued to practice under the same business title until 1937 when he began to practice under his own name. It was in this period of solo practice that Stokes designed the original Milwaukie Union High School along with the school's first renovation in 1927 and the addition of the original gymnasium in 1938. After the end of World War II in 1945, F.M. Stokes partnered with Frederick Stanley Allyn to create the firm Stokes & Allyn, which continued until Allyn's retirement in 1958. Together, Stokes & Allyn designed many school buildings, including the addition of the South Wing to the main building at Milwaukie Union High School and the large addition to the school's boiler room building in 1949.

Many other architects have contributed designs to the development of Milwaukie High School since its original construction. In 1941, the architect Walter E. Kelly designed the Vocational Agricultural Building that was located northeast of the main academic building. In 1953, Richard Wilhelm Sundeleaf designed the first addition to the existing gymnasium as well as the remodels to the older portion of the gymnasium and a remodel of the boiler building to create a shop space. Five years later, the firm Freeman, Hayslip, Tuft, & Hewlett continued the expansion of Milwaukie High School by designing a major renovation of the main academic building and renovating the boiler building again to create the Arts & Crafts use within the boiler building. This firm also designed the addition of the vocal room to the main building and converted the Vocational Agricultural Building into a band building in this expansion project. Many of these architects had been known for their specialization in school design throughout the state of Oregon.

SECTION 4

Exterior Alterations:

The Milwaukie Union High School primary building was constructed in 1925 in an Art Deco design by the architect Francis Marion Stokes. Since 1925, the main building has undergone many additions and alterations, and the campus has expanded to include four more major buildings. These four buildings are the J.C. Lillie Auditorium, the gymnasium, the Commons building, and the Arts & Crafts/ boiler building that includes the Student Health and Wellness Center.

The original campus footprint consisted of the main building, a manual training room and boiler building, and an "athletic field" with minimal landscaping. In 1927, F.M. Stokes completed a preliminary design for a future gymnasium on the eastern side of the main building, but the first portion of the gymnasium was ultimately built in 1938 north of the boiler room in a style similar to that of the main building. That same year, the North Wing was added to the main building. In 1941, the Vocational Agricultural Building was built northeast of the main building. For the next eight years, the site plan remained static with minor alterations, potentially due to the lack of student population growth in the years leading up to World War II. In 1949, a South Wing was added to the main building to accommodate an influx of students. In 1953, a western addition to the gymnasium was constructed that doubled the existing building in size; it included new classrooms, relocated locker rooms and dry areas, and a wrestling room. The older half of the gym underwent a major renovation that included the addition of a tumbling room and the implementation of a new riser seat system. Furthermore, the old boiler room was converted into a shop building with boilers. In 1958, the main building underwent a second major renovation, comprising of the addition of a choir or "vocal" room to the eastern side of the building's central wing. Additionally, the Arts & Crafts/ boiler building continued its transformation with the addition of an arts and crafts classroom, and the Vocational Agricultural Building was converted into a band building.

In 1971, a new auditorium was built in a more modern architectural style with a smaller freestanding Business Education building adjacent to its southeastern corner. The main building underwent many minor interior alterations, the vocal room

OREGON SHPO CLEARANCE FORM CONTINUATION SHEET

Do not use this form for ODOT, Federal Highway projects or to record archaeological sites

was converted into the library administration offices, the old auditorium became a library resource center and reading room, and a smaller administration building came into use southwest of the main building on the other side of Willard Street. A softball field was developed where the original tennis court used to be, and a new grandstand structure was built immediately west of the football field. In 1981, a new electrical lighting system was installed in the football field. The main building underwent reroofing in 1985. In 1993, a new Commons building was built west of the Arts and Crafts/boiler building. In 2000, the second addition to the gymnasium was built on the north side of the existing building. The gymnasium was now three times larger than it had been when it was originally built. In 2008, the original auditorium was expanded to become the J.C. Lillie Auditorium and Performing Arts Building. Both the band room and drama room were remodeled and additions included a new black box theater, a lobby on the eastern entrance, a new art department, and a dance studio. Sometime after this point, it is assumed that the band building was replaced by an equipment storage shed for the football field. In 2011, the Arts & Crafts/boiler building was renovated to include the Student Health and Wellness Center in the southeastern portion of the building, completing the site plan of the current campus footprint.

In general, the main academic building maintains the aesthetics of the 1920's Art Deco style, but certain portions have drastically changed since its primary construction. The most drastic changes are associated with the main entrance, which first had a projecting wood bay removed at the second level sometime prior to 1955. The entry was lowered during the 1958 renovation when the basement level became the main point of entry to increase the number of classrooms on the first floor. The main entryway that had exhibited a recessed metal-frame double door was replaced with a metal-cladded bay window with a decorative framework. This bay window was replaced sometime before 1965 with a large gridded, tripartite single-hung window that mimicked the one located above it. The building's foundation is no longer a heavy-weighted concrete mass, but now contains a corridor that runs alongside the building that was carved out around the same time that the main entrance was renovated. A gridded double door now serves as the current entrance at the lowered level and is recessed under the corridor's protruding overhang. The original wide cement steps that led up to the original entrance and were contained by flaring white stucco walls were flattened out when the ground level was brought down to the basement.

Alterations to the upper portion of the main façade have preserved the building's original appearance and continue to emphasize the verticality of the Art Deco style. A pair of enlarged trapezoidal pilasters frame the two central windows above the main entrance, the original parapet wall extends upward from behind the central frieze, a series of staggered cornices border the entire expanse of the building, and an array of evenly-spaced full-height pilasters with decorative plaster capitals step along the main elevation. The original cream-colored, steel multi-pane windows that ran along the entire façade between these pilasters in a 1956 photograph have been replaced with gridded aluminum-sash, single-hung windows with operable side hoppers. These windows are lined at their bases with a continuous brick sill that appears to be the same one present in 1925. The original lettering on the frieze that once read "Union High School District 5" was replaced sometime after 1974 but before 1983 with lettering in a similar font style that reads "Milwaukie High School". The school's name also read less visibly directly above the current entrance doors, but has been taken down within the past decade.

The buildings north of the main academic building that were built before 1958, including the gymnasium and the portion of the Arts & Crafts/boiler building, are similar in style to the architectural style of the main building. Modifications include the replacement single-hung and slider windows. The Commons Building, built in 1993, exhibits the same stucco exterior as the main building, and is featureless but for its rows of slider windows. The J.C. Lillie Auditorium also reflects the more contemporary architectural style of its time period.

OREGON SHPO CLEARANCE FORM CONTINUATION SHEET

View: Diagram of Significant Additions Since 1925

A more detailed list of alterations made to each building since 1925 includes:

Main Building (1925), North Wing (1938), South Wing (1949)

1925—original construction of the main building contained a basement level, a ground level, and an upper floor. The basement level consisted of a boys’ locker room on the northern end, a girls’ locker room on the southern end, an unexcavated area on the eastern portion of the building underneath the main entrance, and a large cafeteria in the central portion of the building. The ground level consisted of the main entrance and lobby space on the east side of the building, a clinic directly north of the lobby, eight classrooms along the eastern side and northern and south ends, and a large centralized auditorium above the cafeteria. The second level contained a library above the main lobby, six major classrooms within the northern and southern ends, and a large open space above the auditorium below.

1938—The North Wing was added to the main building, complete with three classrooms on the first level and two new classrooms and a band room on the second level. The basement level contained a “play room”, which may have been accessible through an exterior side entrance to the auditorium and utilized for theatrical purposes. The connecting portion of the former basement layout on the north end was renovated with a new locker room to accompany this play room.

1949—The South Wing was added to the southeastern corner of the main building. It included three new classrooms, a home-making room, and a dining room on the ground floor level and a combined total of ten new classrooms on the first

OREGON SHPO CLEARANCE FORM CONTINUATION SHEET

Do not use this form for ODOT, Federal Highway projects or to record archaeological sites

and second levels.

1958—The main building underwent a major reconfiguration of its electrical, gas, ventilation, and structural systems throughout the entire building and a riser system was implemented in a new vocal room, added at the east end of the central auditorium volume. The basement level became the ground level to make way for more classrooms on the first floor, and the main entrance was lowered on the exterior façade to accommodate this alteration.

1971—Many minor alterations to floor and wall heights, the relocation of doors to change circulatory patterns, the installation of furring on existing walls, and the implementation of new lighting and fire sprinkler systems occurred on all levels of the original portion of the main building and its central wing. The vocal room was converted into the library administration offices, and the auditorium into a library resource center and reading room.

1985, 1987—Re-roofing took place on the main building, which included the renovation of parapet walls, existing skylights, flashing, gutters, fascia, downspouts, and other exterior roof components.

2000—Several minor alterations were completed in the main building, the most significant being the reconstruction of the main entry façade and the installation of new windows.

Athletics

1925—Basic landscaping of an “athletic field” east of the main building was included in the original construction.

1949—The track and football field was constructed northwest of the main building extending north to Washington Street, and a tennis court was created directly east of the new South Wing.

1962—The Columbus Day storm leveled the old covered bleachers at the football field. A new steel covered grandstand was constructed in 1964.

1971—A softball field was constructed east to the main building where the tennis court used to be, and a grandstand was constructed between the gym and football field.

1981—An electrical system in the football field was remodeled to add new pole lights around its perimeter.

Gymnasium (1938)

1938—The original gymnasium was constructed to the north of the main building and boiler room, with 23rd Avenue on its west side and its entrance located on its southern side facing the original buildings. The gymnasium contained girls’ and boys’ locker rooms, dry rooms, a balcony space, an apparatus room, and a small corrective exercise room.

1953—The new western addition to the old gymnasium contained new classrooms, relocated locker rooms and dry areas, and a wrestling room, practically doubling the building in size. Both portions of the gymnasium were remodeled to include a single wrap-around interior balcony with access to a new tumbling room over the original southern entrance.

1963-64—A fire in July 1963 caused major damage to the gym, “gutting” it and destroying the roof and interiors. An article in the Oregonian (September 20, 1964) notes that a “new gymnasium- which replaces one destroyed in a fire two years ago- is about ready for occupancy.” Drawings or information on what was lost or rebuilt are not available.

2000—A second addition to the gym was constructed on the north side of the existing building. After this addition, the gymnasium was a little more than three times the size of when it was first built.

2008—The locker room and team rooms were remodeled and new restrooms were added to the gymnasium.

Evolution of the Arts & Crafts/ Boiler Building

1925—A *Manual Training and Boiler Room* was constructed northeast of the main building in the current location of the Milwaukie High School’s Health and Wellness Center.

1949—A large addition with T-shaped floor plan was attached to the east side of the boiler building to create a “Boiler House and Shop” building.

1953—The boiler/ shop building was renovated to better define spaces for a classroom, paint room, and woodshop.

1958—The building was renovated again to create the Arts & Crafts/ boiler building. It contained a larger art area, an office, a ceramics room, an intricate riser system, and girls’ and boys’ toilets on the first level. A mezzanine was also added which included a work shop, dark room, and photography room.

2011—The southeastern corner of the Arts & Crafts/ boiler building that had included a classroom, kiln, storage space, and an office was demolished for the addition of a single-level *Health and Wellness Center* in its place. The new health center included a large classroom, the existing boiler room, office spaces, an infirmary, exam rooms, and a conference room.

OREGON SHPO CLEARANCE FORM CONTINUATION SHEET

Do not use this form for ODOT, Federal Highway projects or to record archaeological sites

Vocational Agricultural Building (1941)

1941—Architect Walter E. Kelly’s design created the Vocational Agricultural Building northeast of the main academic building. This one-story, hipped-roof building contained a large classroom with maple floors, metal and wood working shops, and a small laboratory space. The entry was located on the western façade that faced the north wing of the main building.

1958—The Vocational Agricultural Building was converted into a “band building” at the same time that the vocal room was added to the main building at a close proximity to it.

1971—It is assumed that the band building was replaced sometime after this date by a concrete masonry unit structure.

New Auditorium (1971)

1971—The original construction of the auditorium was northwest of the main building on the other side of the vacated SE 23rd Street.

2008—The auditorium was converted into the *J.C. Lillie Performing Arts Building* with the addition of a new art department and dance studio section on the northeastern corner of the building, a renovation of the band room on the northwestern corner, drama room remodel on the building’s southern side, the addition of a black box theater on the southeastern corner, and a new lobby addition on eastern face of the auditorium. The Business Education Building that was located immediately southeast of the auditorium was demolished to make way for these additions.

Business Education Building (1971)

1971—The Business Education Building was constructed directly southeast of the new auditorium with the vacated 23rd Street on its east side.

Commons (1993)

1993—The Commons building was constructed as an addition to the north side of the main building. It had a “bridge” connection to the main building at the second floor level, and also a connection directly to the Gym. The Commons included a kitchen with cooking, preparation, serving, and dishwashing area, as well as the commons space and administration offices. The second floor was developed with a teachers’ lounge, a balcony, and open sky-lit space.

Administration (1993)

1971—An “administration building” that was acknowledged on the 1971 plot plans was located southwest of the main building on the other side of Willard Street at the intersection of 23rd Avenue and Willard Street. It is assumed that this building served as the administration office before administration offices were constructed as part of the Commons addition.

1993—The school administration moved into newly constructed offices in the new Commons building.

CITY OF MILWAUKIE PREAPPLICATION APPOINTMENT WORKSHEET

6101 SE Johnson Creek Blvd. - Milwaukie, OR 97206 Tel.: (503) 786-7600

A preapplication appointment is strongly recommended, and in some cases is required, for development proposals that require land use approvals and for major commercial building improvements. The purpose of the appointment is to help the applicant through the land use and permit process.

Preapplication Meeting – First meeting free, second meeting \$50.00, third and subsequent meetings \$100.00/mtg.

- Optional meeting with 2 City staff. No meeting notes are provided by staff.
- Appointments should be made at least one week in advance of the desired meeting date. Check with staff for available meeting times.
- Requires 3 copies of the Submittal Information listed on the back of this page.

Preapplication Conference – \$200.00

- Optional or required meeting with 3 or more staff. Meeting notes are provided within 2 weeks.
- The City is represented by staff from the following departments: Planning, Building, and Engineering. Other public agencies (such as the Fire District) may attend as necessary.
- Appointment times are Thursdays from 10:00 a.m.–11:00 a.m.
- Appointments must be made no less than two weeks in advance of the desired meeting date.
- Requires 8 copies of the Submittal Information listed on the back of this page.

Traffic Impact Study Review – \$100.00

- Mandatory second meeting if the project requires a Traffic Impact Study.
- To be scheduled after completion of a Traffic Impact Study by the applicant.

To be completed by the Applicant

Today's Date: May 5, 2017 Time: _____

Project Address: 11300 SE 23rd Ave and Lake Road at 28th Ave.

Brief Proposal Description: This Pre-App request has been submitted for two of the district's properties within the City of Milwaukie, the Milwaukie High School and the Lake Road Sports Fields. Please see the attached preliminary development plans and the attached letter for more information.

May 15, 2017

Mr. Denny Egner
Planning Director
City of Milwaukie
6101 SE Johnson Creek Boulevard
Milwaukie, OR 97206

Milwaukie High School and Lake Road Sports Complex
Pre-Application Conference Request
Milwaukie, Oregon

Dear Denny,

This office represents the North Clackamas School District. This letter has been prepared in order to request a pre-application conference to discuss two projects within the City of Milwaukie related to the District's facilities at the Lake Road Sports Complex and at Milwaukie High School. The district is proposing to complete several bond related improvements to both sites and requests a meeting with the City's planning and engineering staff to discuss the submission requirements and approval process for both projects.

Provided below is a description of each project and a list of questions for staff's consideration prior to the pre-application conference meeting:

Milwaukie High School

Milwaukie High School is located at 11300 SE 23rd Avenue within the City of Milwaukie. The site in question consists of taxlot 1s1e36bc 05600. The site is approximately 14.7 acres and is primarily zoned R-2. A small portion of the site west of 23rd Avenue is zoned R1B.

The project at Milwaukie High School involves the demolition of the original school structures (from 1925 to 1949). A new school facility will be constructed in the similar location – which will contain the academic and administrative functions. The existing Commons Building (constructed in 1993) will remain and be extensively remodeled. The new school will be physically joined to the Commons – to provide a more cohesive and connected campus.

Also under consideration is the possible removal of one or more of the existing large, mature trees located on the west side of the original school building. This existing area will be redeveloped to include a new main entry plaza, improved pedestrian circulation, improved vehicular circulation and new landscaping.

The overall scope of work includes various building improvements (both interior and exterior) and site improvements. The list below describes the current anticipated on-site schedule of improvements:

- Replace Main Academic Building
- Remodel Existing Commons Building
- Food Service / Kitchen Remodel and Improvements

-
- Technology Improvements
 - Seismic Improvements
 - Accessibility (ADA) Improvements
 - Emergency Generator Replacement
 - Re-Roof Auditorium and Commons Building
 - Parking Lot Repairs and Improvements
 - Stadium Field Turf Replacement
 - Athletic Track Resurfacing
 - New Stadium Scoreboards
 - A New Electronic Reader Board Facing Willard Street
 - Exterior and Interior Painting
 - New Landscaping
 - New Parking Areas

The project scope involves work beyond the main campus. Athletic field improvements and replacements will occur at Lake Road Facility, Rowe Middle School and Milwaukie Elementary. The proposed improvements to the Lake Road Facility are anticipated to progress along a similar timeline therefore this request for a pre-application conference covers both properties and projects. The proposed improvements to the Lake Road Facilities are described below.

Lake Road Sports Facilities

The Lake Road Sports Complex is located along Lake Road at approximately 28th Avenue within the City of Milwaukie. The site in question consists of taxlot 1s1e36ca 01200. The site is approximately 9.6 acres and is primarily zoned R-7.

The project scope for the sports complex includes the construction of a new varsity baseball field and a new varsity softball field. Other improvements on the property will include the creation of improved parking facilities, new concessions, and new dugouts and backstops.

Questions for Staff

The following questions have been prepared in order for staff's consideration:

- Please provide us copies of the staff reports associated with the most recent Community Use Applications for either the Lake Road Facility or the High School.
- Please confirm the overall land use review process and anticipated timeline for review for the required applications.
- Please review and confirm whether the City is comfortable receiving concurrent applications for Historic Demolition Review, Amendment of the City's Comprehensive Plan Map to remove the Historic Overlay from the High School Site, and the proposed modification to the Community Service Use. We understand that the required Design Review Application for both sites is to be submitted following the approval of the Community Service Use Applications.
- Please review and comment on the Overall Site Constraints/Challenges – which include the following:
 - Site will be fully occupied during the construction phases
 - Campus will need to be accessed by busses, emergency vehicles and pedestrians

-
- Daily classes, special events and athletic events will be occurring
 - Modular classrooms will need to be used to accommodate students during construction
 - The CM/GC will have limited site area for construction related activities, storage, vehicles, etc.
 - In reference to Site Study 1: Please review the proposed new Bus Lane. Would this configuration be acceptable on SE Willard Street?
 - In reference to Site Study 2: Please review the configuration / layout of the proposed new Bus Lane on the east side of the school property. Would (2) new driveways/curb cuts be allowed on this section of SE Willard Street?
 - In reference to Site Study 2: Please review the proposed new Parent Drop-Off/Pick-Up Lane. Would this configuration be acceptable on SE Willard Street?
 - What is the City's permit process for Tree Removal?
 - What is the City's permit process for Modular Buildings? (non-permanent installation)
 - Due to the project phasing, separate permit packages will be submitted for the Lake Road Facility Field Improvements and for the High School. Please confirm whether the City supports separate submissions for these projects.
 - What is the City's permit process for adding exterior lighting to play fields and/or tennis courts?

We genuinely appreciate the City's assistance with these projects and we look forward to working with staff throughout this process. Please feel free to give me a call if you have any questions or need any additional clarification.

Sincerely,

Andrew Tull

File 17398

PRELIMINARY PROJECT SCOPE

- A** Campus Improvements
Main Building Replacement
(See Enlarged Diagram)
- B** Running Track Resurfacing
Running Track Striping
Field Turf Replacement
New Stadium Scoreboards
- C** Relocate Varsity Softball Field to
Lake Road Facility
- D** Remove Existing Tennis Courts
New Parking Lot
- E** Improvements to JV Softball Field
at Milwaukie ES
- F** New Varsity Softball Field
- G** New Varsity Baseball Field
(Relocate Field Adjacent to Soft
ball Field)

SCOPE DIAGRAM

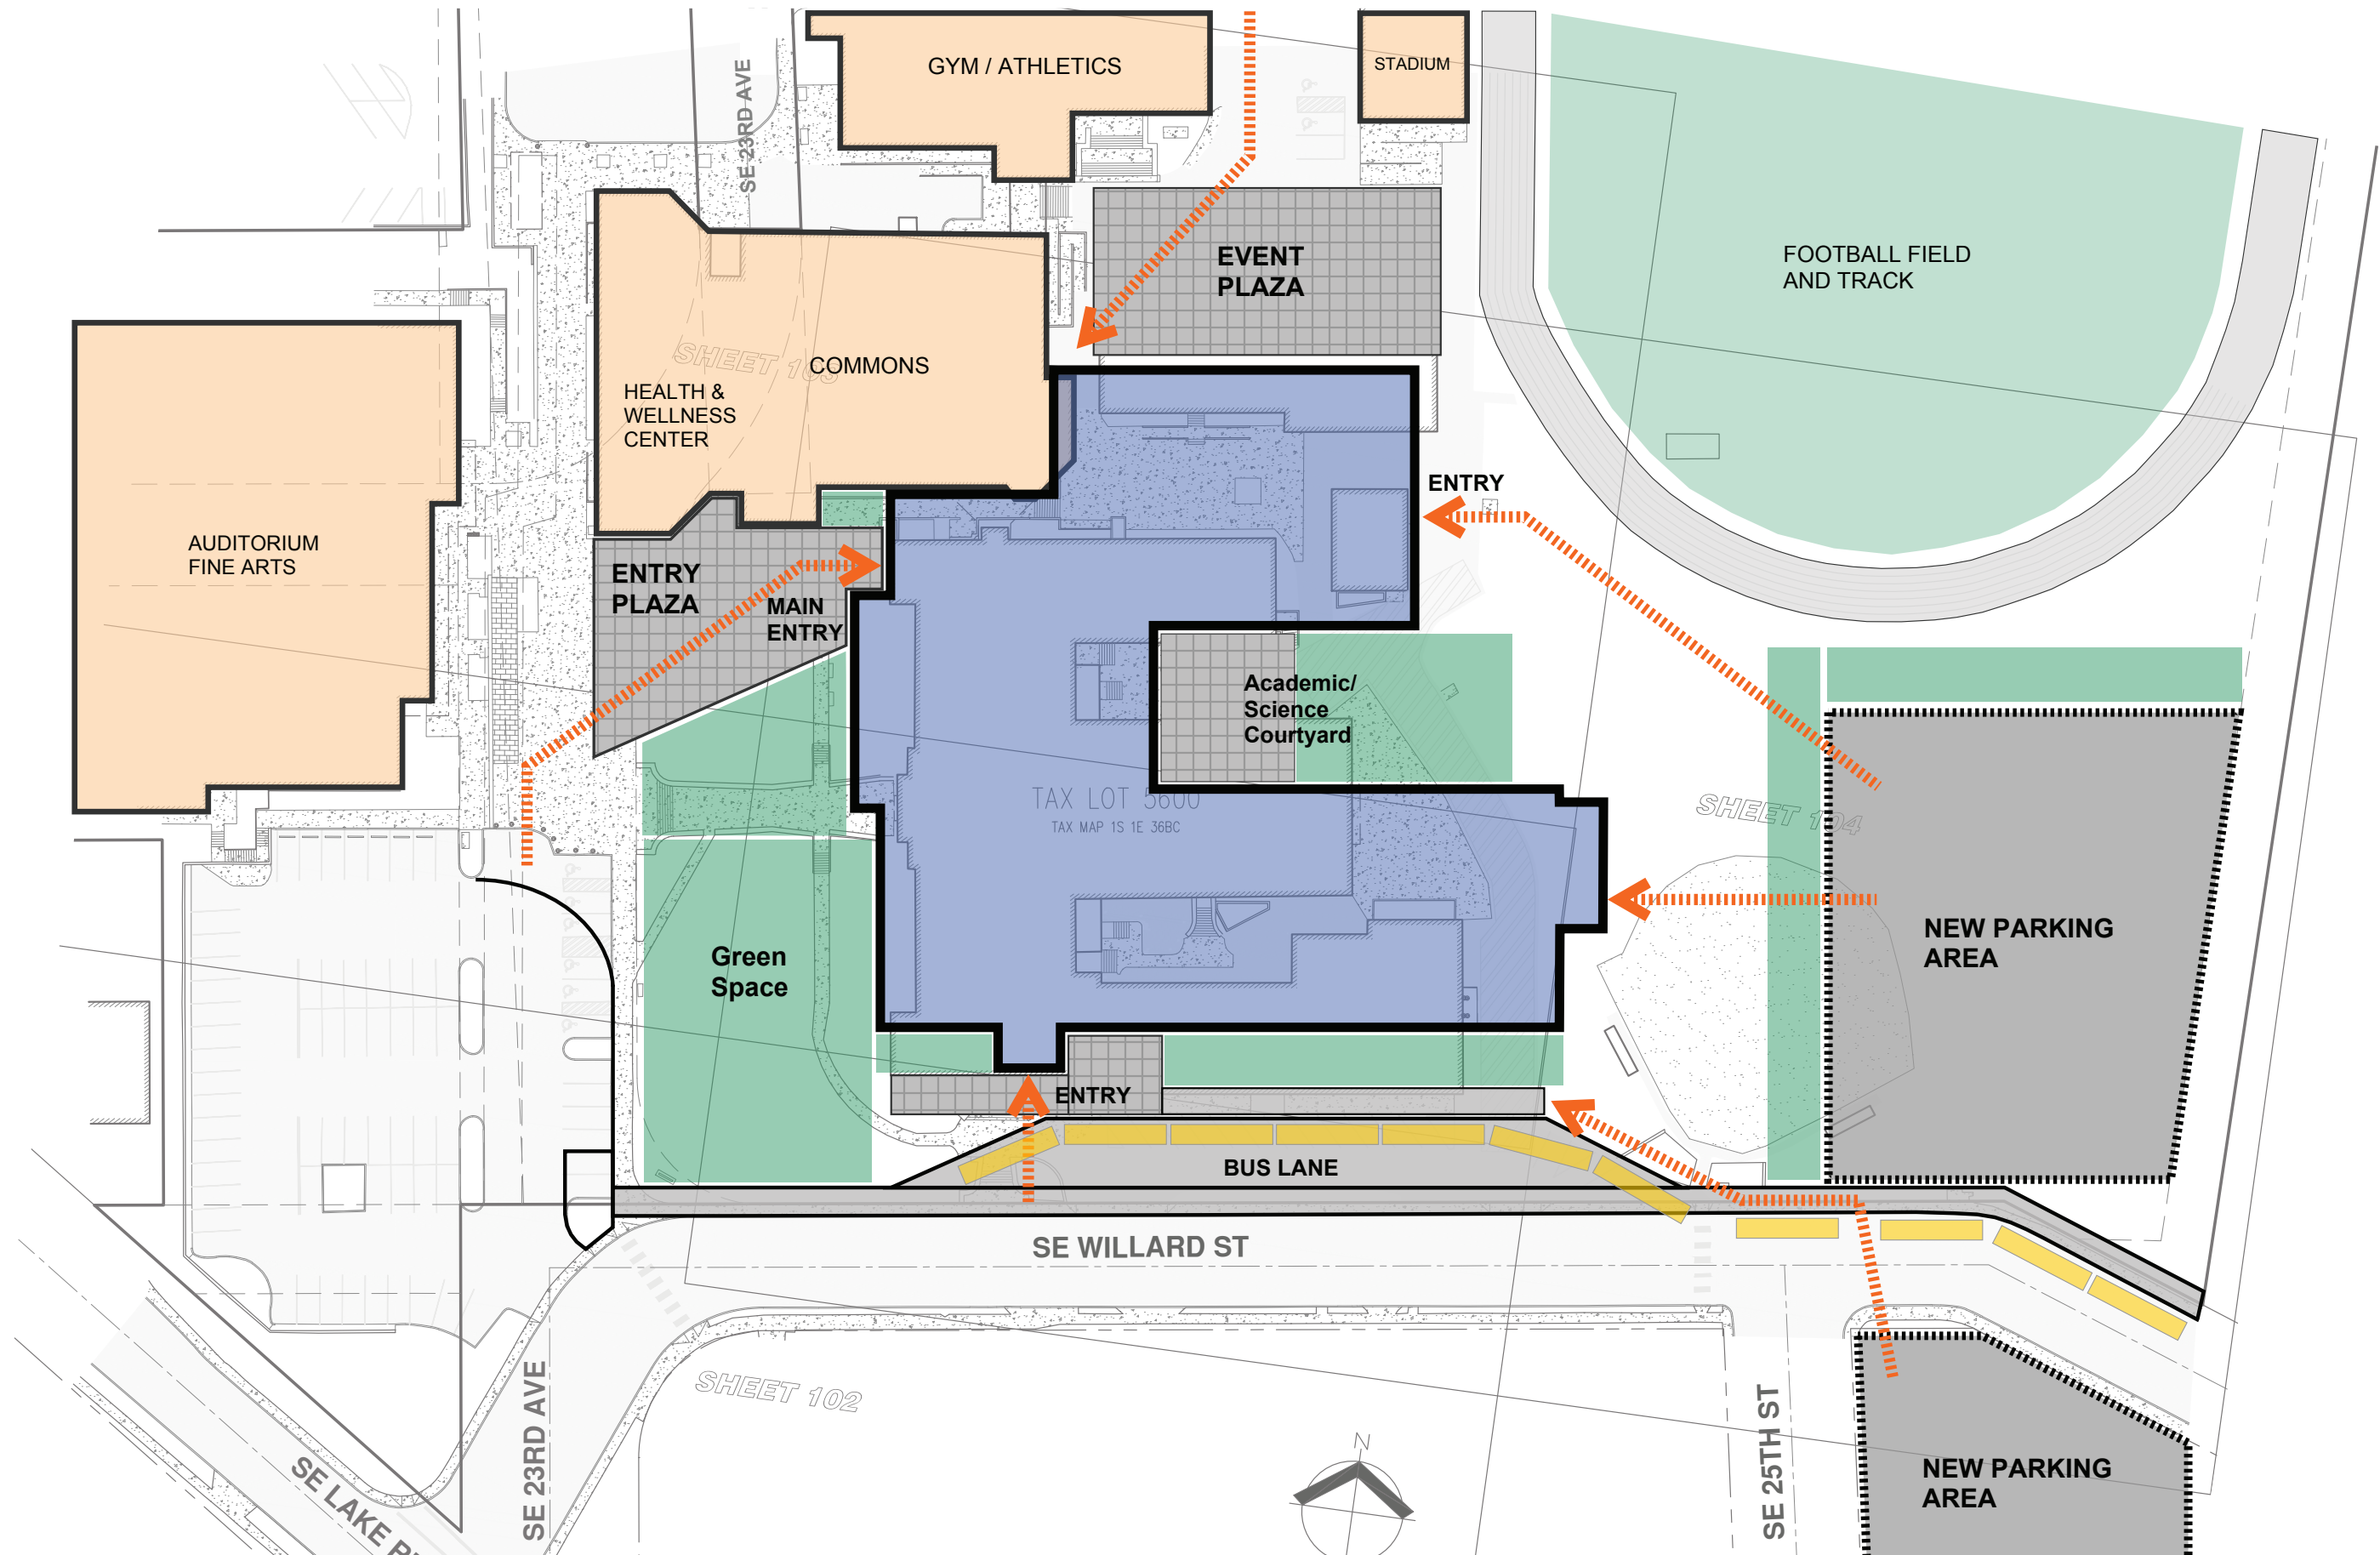

PRELIMINARY PROJECT SCOPE

- 1** Main Building Replacement
Remove Boiler Building and Health & Wellness Center
- 2** Commons Improvements
Kitchen Remodel
Remodel Office Area
Re-Roof Commons Building
- 3** Gym Interior Improvements
Painting, Scoreboards
Refinish Gym Flooring
New Athletic Lockers
- 4** Re-Roof Auditorium
- 5** Main Parking Lot Improvements
- 6** Main Entry Plaza Improvements
- 7** North Parking Lot Improvements
- 8** Running Track Resurfacing
Running Track Striping
Field Turf Replacement
New Stadium Scoreboards
- 9** Remove Varsity Softball Field
Replace with New Parking Lot
- 10** Remove Existing Tennis Courts
Replace with New Parking Lot
- 11** ADA Improvements to Stadium
New Elevator to Press Box

Re: Preapplication Report

Dear Andrew:

Enclosed is the Preapplication Report Summary from your meeting with the City on June 12, 2017, concerning your proposal for action on property located at 11300 SE 23rd Ave, and Lake Rd and 28th Ave.

A preapplication conference is required prior to submittal of certain types of land use applications in the City of Milwaukie. Where a preapplication conference is required, please be advised of the following:

- Preapplication conferences are valid for a period of 2 years from the date of the conference. If a land use application or development permit has not been submitted within 2 years of the conference date, the Planning Director may require a new preapplication conference.
- If a development proposal is significantly modified after a preapplication conference occurs, the Planning Director may require a new preapplication conference.

If you have any questions concerning the content of this report, please contact the appropriate City staff.

Sincerely,

Alicia Martin
Administrative Specialist II

PRE-APPLICATION CONFERENCE REPORT

This report is provided as a follow-up to a meeting that was held on 6/12/2017 at 10:00am

Applicant Name: Andrew Tull

Company: 3J Consulting, Inc.

Applicant 'Role': Other

Address Line 1: 5075 SW Griffith Drive, Ste 150

Address Line 2:

City, State Zip: Beaverton OR 97005

Project Name: Milwaukie High School and Lake Road Sports Fields

Description: Bond-related improvements to both sites. MHS-demolition of original school structures, new construction of school facilities, and remodeling of remainig Commons Building. Sports Fields-new baseball/softball fields and improved amenities including parking facilities.

ProjectAddress: 11300 SE 23rd Ave and Lake Rd/28th Ave

Zone: Residential R-2, R-1-B, and Downtown Mixed Use (DMU) on main campus

Occupancy Group:

ConstructionType:

Use: Primarily Public (P), with Mixed Use (C/HD), High Density (HD), and Transit Center (TC)

Occupant Load:

AppsPresent: Daniel Chin, Steve Nicholas, Garry Kryszak, Dan Houf, Jeffery Creel, Matt Jacoby, Andrew Tull, Ben Austin, Mercedes Smith, Mark Wharry, Eric Melle

Staff Attendance: Brett Kelper, Alex Roller, Samantha Vandagriff, Keith Liden

BUILDING ISSUES

ADA: The new building will need to be fully ADA compliant. 25% of the project costs for the other buildings will need to go toward the removal of architectural barriers (ADA compliance). An ADA improvement plan can be submitted incorporating the various projects and sites and utilized to show compliance with this requirement.

Structural: Separate permits for each building will be required at time of submittal.

Mechanical:

Plumbing:

Plumb Site Utilities:

Electrical:

Notes:

Please note all drawings must be individually rolled. If the drawings are small enough to fold they must be individually folded.

FIRE MARSHAL ISSUES

Fire Sprinklers: Fire sprinklers may be required based on the floor design.

Fire Alarms:

Fire Hydrants:

Turn Arounds:

Addressing:

Fire Protection:

Fire Access:

Hazardous Mat.:

Fire Marshal Notes: See attached.

PUBLIC WORKS ISSUES

Water: City of Milwaukie 6-inch and 10-inch water mains on SE Washington and an 8-inch lines in Willard provide service to the property currently. The water System Development Charge (SDC) is based on the size of water meter serving the property. The corresponding water SDC will be assessed with installation of a water meter. Water SDC credit will be provided based on the size of any existing water meter serving the property removed from service. The water SDC will be assessed and collected at the time the building permits are issued.

Applicant expressed interest in connecting the performing arts building to the main building with an enclosed structure. There is currently a City water main running between these building, preventing any building from being constructed here. Applicant expressed interest in abandoning this portion of the main. The connection locations to the main for domestic and fire are unclear at this point. Further discussions with City staff will be required to establish how the abandonment process may be completed.

Sewer: Two City of Milwaukie wastewater mains provide service to property. A clay 8-inch wastewater main on SE Willard and an HDPE 8" main on SE 23rd Avenue. The city would like to vacate the southern approximately 150-feet of SE 23rd Avenue. Currently the City wastewater main extends through this portion. High school property is the only property accessing these last 150-feet. With vacation of the end of 23rd Avenue, applicant would be responsible for constructing a new manhole at the end of the new right of way, and the existing manhole and main now on High School property will become private. With this 23rd Avenue vacation, the City would require the High School to dedicate a 25-foot

width to extend the Adams Street right-of-way. The wastewater System Development Charge (SDC) is comprised of two components. The first component is the City's SDC charge of \$1,075 and the second component is the County's SDC for treatment of \$6,130 that the City collects and forwards to the County. Both SDC charges are per connection unit. The wastewater SDC is assessed using a plumbing fixture count from Table 7-3 of the Uniform Plumbing Code. The wastewater SDC connection units are calculated by dividing the fixture count of new plumbing fixtures by sixteen. The wastewater SDC will be assessed and collected at the time the building permits are issued. Existing fixture count will need to be submitted to the City, which will provide credit. Applicant will only be charged for new fixtures.

Storm:

Submission of a storm water management plan by a qualified professional engineer is required as part of the proposed development. The plan shall conform to Section 2 - Stormwater Design Standards of the City of Milwaukie Public Works Standards. The storm water management plan shall demonstrate that the post-development runoff does not exceed the pre-development, including any existing storm water management facilities serving the development property. Also, the plan shall demonstrate compliance with water quality standards. The City of Milwaukie has adopted the City of Portland 2008 Stormwater Management Manual for design of water quality facilities. All new impervious surfaces, including replacement of impervious surface with new impervious surfaces, are subject to the water quality standards. See City of Milwaukie Public Works Standards for design and construction standards and detailed drawings.

The storm SDC is based on the amount of new impervious surface constructed at the site. One storm SDC unit is the equivalent of 2,706 square feet of impervious surface. The storm SDC is currently \$845 per unit. The storm SDC will be assessed and collected at the time the building permits are issued.

Street:

The proposed development fronts the south side of SE Washington Street, a Collector street. The portion of SE Washington Street fronting the proposed development has a right-of-way width of 60 feet and a paved width of 36 feet with curb on both sides and sidewalk improvements on the south side.

The proposed development fronts the north side of SE Willard Street, a local road. The portion of SE Willard Street fronting the proposed development has a right-of-way width of 50 feet, a paved width of 36 feet, and has sidewalk on both sides of the road.

The proposed development fronts the east side of SE 23rd Avenue, a local road. The portion of SE 23rd Avenue fronting the proposed development has a right-of-way width of 40 feet, a paved width of 26 feet, and sidewalk on both sides of the road.

The proposed development fronts the east side of SE 21st Avenue, a local road. The portion of SE 23rd Avenue fronting the proposed development has a right-of-way width of 60 feet, a paved width of 34 feet, and sidewalk on both sides of the road.

Frontage:

Chapter 19.700 of the Milwaukie Municipal Code, hereafter referred to as "Code", applies to partitions, subdivisions, and new construction.

Transportation Facility Requirements, Code Section 19.708, states that all rights-of-way, streets, sidewalks, necessary public improvements, and other public transportation facilities located in the public right-of-way and abutting the development site shall be adequate at the time of development or shall be made adequate in a timely manner.

SE Willard Street
According to Code Table 19.708.2 and the Transportation Design Manual, the local street cross section

includes the following:

- 10-foot travel lanes
- 6-foot parking strips with curb
- 5-foot landscape strips
- 5-foot setback sidewalks

Applicant is proposing a different cross section with a pull-out area with setback curb for parent drop off. Final design will need approval by the engineering director. Applicant will construct these improvements.

SE Lake Road

The necessary improvements to Lake Road in front of Rowe Middle School were previously constructed with a Capital Improvement Project. The applicant is not responsible for any additional improvements. Property on Lake near 28th Avenue has already dedicated, and will not require any other improvements.

West of Willard/Lake Road intersection: The final cross section of Lake road includes a center turn lane.

Required improvements on Lake Road are as follows:

- 6-foot setback sidewalk
- 5-foot planter strip
- curb & gutter
- connect to existing asphalt

Improvements will be constructed to the west to meet with improvements previously constructed with the PMLR project.

Adams Street

Improvements required in the newly dedicated Adams Street right-of-way will be a pedestrian connection from 23rd to Adams Street.

25th Avenue

Parking will be restriped from head in to angled parking. Striping will face the cars northeast.

Right of Way:

Applicant will be responsible for 25-foot right-of-way dedication to extend Adam Street's right-of-way to connect to SE 23rd Avenue. Upon receipt of this dedication, the City will initiate full right-of-way vacation of approximately 150-feet of the south end of SE 23rd Avenue.

Applicant will be responsible for 9.18-foot right-of-way dedication of existing tennis court lot on Willard frontage.

The remaining existing right-of-way on SE Willard, SE Washington Street, and SE Lake Road fronting the proposed development properties (including Rowe, and 28th Ave facility) is of adequate width and no right-of-way dedication is required.

Driveways:

Code Section 12.16.040.A states that access to private property shall be permitted with the use of driveway curb cuts and driveways shall meet all applicable guidelines of the Americans with Disabilities Act (ADA). Driveway approaches shall be improved to meet the requirements of Milwaukee's Public Works Standards. Dual driveways with signage indicating ingress and egress are approvable without a variance to driveway spacing standards, as they will function as one driveway.

Erosion Control:

Per Code Section 16.28.020(C), an erosion control permit is required prior to placement of fill, site clearing, or land disturbances, including but not limited to grubbing, clearing or removal of ground

vegetation, grading, excavation, or other activities, any of which results in the disturbance or exposure of soils exceeding five hundred square feet.

Code Section 16.28.020(E) states that an erosion control permit is required prior to issuance of building permits or approval of construction plans. Also, Section 16.28.020(B) states that an erosion control plan that meets the requirements of Section 16.28.030 is required prior to any approval of an erosion control permit.

Traffic Impact Study: Code Section 19.704.1(A) states that the City will determine whether a transportation impact study (TIS) is required. In the event the proposed development will significantly increase the intensity of use; a transportation impact study will be required. The Engineering director has determined that a TIS will not be required.

PW Notes:

TRANSPORTATION SDC

The Transportation SDC will be based on the increase in trips generated by the new use per the Trip Generation Handbook from the Institute of Transportation Engineers. The SDC for transportation is \$1,921 per trip generated. Credits will be given for any demolished structures, which shall be based upon the existing use of the structures.

PARKS & RECREATION SDC

The parks & recreation System Development Charge (SDC) is triggered when application for a building permit on a new dwelling is received. Currently, the parks and recreation SDC for each employee is \$60.00. Credit is applied to any demolished structures and is based upon the existing use of the structures. The parks and recreation SDC will be assessed and collected at the time the building permits are issued.

REQUIREMENTS AT FINAL PLAT

- Engineered plans for public improvements (street, sidewalk, and utility) are to be submitted and approved prior to start of construction. Full-engineered design is required along the frontages of the proposed development.
- The applicant shall pay an inspection fee of 5.5% of the cost of public improvements prior to start of construction.
- The applicant shall provide a payment and performance bond for 100% of the cost of the public improvements prior to the start of construction.
- The applicant shall provide a final approved set of Mylar "As Constructed" drawings to the City of Milwaukie prior to the final inspection.
- The applicant shall provide a 1 year maintenance bond for 100% of the cost of the public improvements prior to the final inspection.

PLANNING ISSUES

Setbacks:

Yard requirements for the Residential R-2 and R-1-B zones are established in Milwaukie Municipal Code (MMC) Subsection 19.302.4. Minimum front and rear yards are 15 ft, side yards (for other than rowhouses) must be at least 5 ft, and street-side yards (for corner lots) are 15 ft. There are additional yard setback requirements for Lake Road and Washington Street, but the proposed buildings and areas of work are not located near these frontages.

For side yards in the R-2 and R-1-B zones, there is a building height plane limit of 25 ft at the minimum setback, with a slope of 45 degrees. See the definition of "side yard height plane" in MMC Section 19.201 for an illustration of this principle. MMC Subsection 19.501.3.B establishes some allowable exceptions to the side yard height plane, including limited minor encroachments for roof overhangs or eaves, gable ends of roofs, and dormers.

Yard setbacks for accessory structures are established in MMC Subsection 19.502.2 and depend on the size and height of the proposed structure, varying from 3 to 5 ft to the same standards as the base R-2 and R-1-B zones. Accessory structures must be located beyond the front yard of the primary structure, unless they are at least 40 ft from the front lot line. Utility apparatus, such as air conditioners, must be at least 3 ft away from side and rear property lines and are not permitted in any required front yard setback or street-side yard setback.

The maximum building height in the R-2 and R-1-B zones is 3 stories or 45 ft, whichever is less.

Based upon the description of the proposed improvements, the setback and building height requirements in the DMU, R-7, and R-10 zones are not anticipated to be relevant.

Landscape:

In the R-2 and R-1-B zones, a minimum of 15% of the site must be landscaped. In addition, at least 40% of the front yard area must be vegetated (measured from the front property line to the front face of the house). Vegetated areas may be planted in trees, grass, shrubs, or bark dust for planting beds, with no more than 20% of the landscaped area finished in bark dust (as per MMC Subsection 19.504.7). A maximum of 30% of the site may be covered by structures, including decks or patios over 18 inches above grade. Note that artificial turf does not count toward the required landscape area.

Parking:

As per the off-street parking standards of MMC Chapter 19.600, a high school must provide at least 1 off-street parking space per 0.25 students plus 1 space per staff member. Sport field parking will require a formal determination of the minimum and maximum quantities, in accordance with MMC Subsection 19.605.2. Bicycle parking is required at a rate of 10% of the required number of vehicle parking spaces. The standards for parking areas are established in MMC Section 19.606 and include requirements for stall and drive aisle dimension, perimeter and interior landscaping, pedestrian walkways, and lighting. See the various figures provided throughout MMC 19.600 for more information regarding vehicular and bicycle parking standards.

Transportation Review:

The proposed subdivision triggers the requirements of MMC Chapter 19.700 Public Facility Improvements. The high school campus has frontage on Willard Street and Lake Road. Please see the Public Works notes or contact the City's Engineering Department for more information about the requirements of MMC 19.700.

Application Procedures:

An Historic Resource review is required to address the designation of the original high school building as a "significant" historic resource. MMC Subsection 19.403.7 establishes a procedure for demolition of historic resources, but demolition does not remove the property from the historic and cultural resources inventory or change its designation on the zoning map or in the Comprehensive Plan. The applicant must go through the process outlined in MMC Subsection 19.403.4 to delete the property from the inventory, which will eliminate the need for the demolition review outlined in MMC 19.403.7. The deletion application will be processed with Type IV review (in accordance with the procedures established in MMC Section 19.1007) and will include amendments to both the Comprehensive Plan and the zoning map. MMC 19.403 does not include criteria for approval of deletion requests; the application should address the approval criteria for Comprehensive Plan text and map amendments (provided in MMC Subsection 19.902.3.B) and those for zoning map amendments (provided in MMC Subsection 19.902.6.B).

Applications for major modification to existing Community Service Uses (CSUs) are subject to Type

III review as per MMC Subsection 19.904.3. The proposed development involves three distinct sites (high school campus, sports fields on Lake Road, and Rowe Middle School tennis courts), and three distinct applications for major modification to a CSU will be required: (1) high school replacement and remodel, (2) renovation of the Lake Road sports fields, and (3) placement of tennis courts at the Rowe site. The procedures for Type III review are established in MMC Section 19.1006.

MMC Table 19.605.1 does not provide quantity requirements for athletic fields, so a Type II application for parking quantity determination will be required for the Lake Road sport fields. Application requirements and approval criteria are established in MMC Subsection 19.605.2. If a Traffic Impact Study (TIS) is required for any component of the project, a Transportation Facilities Review (TFR) application will be required, as per MMC Subsection 19.703.2.B. Otherwise, compliance with the relevant standards of MMC Chapter 19.700 will be included with the review of any concurrent applications.

Variations to any relevant standards will be subject to the provisions of MMC Section 19.911 and processed with either Type II or Type III review accordingly.

Current application fees are \$1,000 for Type II review, \$2,000 for Type III review, and \$5,000 for Type IV review. Multiple applications for one project component (i.e., high school campus, Lake Road sports fields, or Rowe tennis courts) can be reviewed concurrently as per MMC Subsection 19.1001.6.B, with the highest numbered review type determining the process for all concurrent applications. For multiple applications processed concurrently, there is a 25% discount for all application fees after the most expensive one.

Note: There are pro's and con's for packaging the historic inventory deletion with the CSU application package for the high school campus, due to the different timelines for Type III and IV review. On one hand, it makes sense to submit the historic inventory deletion as part of the CSU package for the high school campus, so the deletion request can be considered in the context of the overall remodel. If submitted concurrently, the CSU decision would be made by the Planning Commission with approval contingent on the City Council's approval of the requested deletion from the historic inventory, which adds at least 20 days to the process. If the deletion request were to be denied, the applicant could then pursue the demolition process. Or for more certainty in the process timeline, the historic inventory deletion application could be submitted in advance of the high school campus CSU package. Regardless, no development permits will be issued until the end of the appeal period for the overall final decision.

For the City's initial review, the applicant should submit 5 complete copies of the application materials, including all required forms, checklists, narrative, and plans. (Note: Disregard the call for 12 copies noted in the code and on several checklists.) A determination of the application's completeness will be issued within 30 days. If deemed incomplete, additional information will be requested. If deemed complete, additional copies of the application may be required for referral to other departments, the Historic Milwaukie Neighborhood District Association (NDA), Lake Road NDA, and other relevant parties and agencies. City staff will inform the applicant of the total number of copies needed.

Prior to submitting the application, the applicant is encouraged to present the project at a regular meeting of the Historic Milwaukie and Lake Road NDAs. The Historic Milwaukie NDA meets at 6:30 p.m. on the second Monday of most months at Libbie's Restaurant (11056 SE Main St); the Lake Road NDA meets at 6:30 p.m. on the second Wednesday of most months at Rowe Middle School (3606 SE Lake Rd).

Once the application is deemed complete, a public hearing with the Planning Commission will be scheduled. Staff will determine the earliest available date that allows time for preparation of a staff

report (including a recommendation regarding approval) as well as provision of the required public notice to property owners and residents within 300 ft of the subject property, at least 20 days prior to the public hearing. A sign giving notice of the application must be posted on the subject property at least 14 days prior to the hearing.

Issuance of a decision starts a 15-day appeal period for the applicant and any party who establishes standing. The appeal period must have ended without event before permits for development on any of the new lots will be issued.

Natural Resource Review: The Milwaukie High School, the Lake Road sports fields, and Rowe Middle School tennis court sites do not include any designated natural resource areas.

Lot Geography: The three school properties in question are all largely rectilinear but irregular in shape. The Milwaukie High School main campus occupies much of the block bounded by Willard Street and Lake Road on the south, 21st Avenue on the west, Washington Street on the north, and residential properties along 27th Avenue on the east. An additional lot south of Willard Street and west of 25th Avenue is developed with tennis courts for the high school. The athletic fields complex has frontage on Lake Road at 28th Avenue and is surrounded by residential properties, with the Milwaukie Elementary School campus adjacent to the northwest. The Rowe Middle School tennis courts are at the northeast corner of the Rowe campus, at Lake Road and Shell Lane.

Planning Notes: For the overall project, staff recommends as much communication between the project management team and the NDAs and immediate neighbors as possible, so that people in the community understand the project, its timeline and phases, and the impacts it is likely to have on the neighborhood. It would be useful to have a follow-up meeting with the City to discuss project phasing, proposed location of modular classrooms, and similar details related to how the project will impact the neighborhood and larger community during construction.

For the high school replacement and remodel, the applicant is advised to consider the following:

- * Within the application narrative, provide information that describes the extent of the work, including phasing and overall timeline, use of modular classrooms (number, location, etc.), proposed landscaping and tree removal, access and circulation, and field lighting.
- * In particular, provide the rationale for removing the historic building and significant trees, including evaluation of any alternatives that were considered.
- * Even if a TIS is not required, there are several circulation issues that should be addressed regarding buses, cars, pedestrians, and cyclists. The aim is to keep the site simultaneously safe and accessible during and after construction. An analysis of parking should compare existing and proposed off-street parking for vehicles and bicycles, including access to all parking areas.
- * In addressing the CSU approval criteria (MMC Subsection 19.904.4), the narrative should clarify the hours and levels of operation of both the main campus in general and the football field in particular.
- * See the Public Works/Engineering notes for more information on the potential requirement for dedication to extend Adams Street as well as for a City-initiated vacation of a portion of 23rd Avenue.

For the Lake Road sports fields:

- * The proposed new field lighting and artificial turf will expand the intensity of use of the site throughout the day and year. The narrative should address this issue in the context of the evaluation of public benefits versus negative impacts on the neighborhood (MMC Subsection 19.904.4.D). Elaborate on how impacts will be mitigated.
- * In the past, the City has received complaints related to overflow parking along the narrow accessway leading from Lake Road up to the parking area. The parking quantity determination component of the application should include an analysis of historical parking demand at the site and should demonstrate that the existing parking area is adequate or will be made adequate to meet parking demand without compromising the accessway.

For the Rowe tennis courts:

* In the narrative, explain whether or how the intensity of use of the existing courts will change. For example: What will be the timing and nature of any high school matches or tournaments that will occur at Rowe? Will the courts be lighted, thus expanding the intensity of use?

The City strongly recommends a second formal preapplication conference for review and comment on plans as revised after this preapplication conference. A formal follow-up conference would provide a structured opportunity for various departments to evaluate and comment consistently on revisions, with written notes as documentation.

ADDITIONAL NOTES AND ISSUES

County Health Notes:

Other Notes:

This is only preliminary preapplication conference information based on the applicant's proposal and does not cover all possible development scenarios. Other requirements may be added after an applicant submits land use applications or building permits. City policies and code requirements are subject to change. If you have any questions, please contact the City staff that attended the conference (listed on Page 1). Contact numbers for these staff are City staff listed at the end of the report.

Sincerely,

City of Milwaukie Development Review Team

Clackamas County Fire District #1

Fire Prevention Office

E-mail Memorandum

To: City of Milwaukie Planning Department
From: Matt Amos, Fire Inspector, Clackamas Fire District #1
Date: 6/26/2017
Re: Milwaukie High School 11300 SE 23rd Ave 17-011PA

This review is based upon the current version of the Oregon Fire Code (OFC), as adopted by the Oregon State Fire Marshal's Office. The scope of review is typically limited to fire apparatus access and water supply, although the applicant must comply with all applicable OFC requirements. When buildings are completely protected with an approved automatic fire sprinkler system, the requirements for fire apparatus access and water supply may be modified as approved by the fire code official. The following items should be addressed by the applicant:

A Fire Access and Water Supply plan is required for subdivisions and commercial buildings over 1000 square feet in size or when required by Clackamas Fire District #1. The plan shall show fire apparatus access, fire lanes, fire hydrants, fire lines, available fire flow, FDC location (if applicable), building square footage, and type of construction. The applicant shall provide fire flow tests per NFPA 291, and shall be no older than 12 months. Work to be completed by experienced and responsible persons and coordinated with the local water authority.

Access:

- 1) No part of a building may be more than 150 feet from an approved fire department access road.
- 2) Buildings exceeding 30 feet in height shall require extra width and proximity provisions for aerial apparatus.

Water Supply:

- 1) Fire Hydrants, Commercial Buildings: Where a portion of the building is more than 400 feet from a hydrant on a fire apparatus access road, as measured in an approved route around the exterior of the building, on-site fire hydrants and mains shall be provided.

Note: This distance may be increased to 600 feet for buildings equipped throughout with an approved automatic sprinkler system.

- 2) The fire department connection (FDC) for any fire sprinkler system shall be placed as near as possible to the street, and within 100 feet of a fire hydrant.

Note:

Comments may not be all inclusive based on information provided.

Area Program / Educational Specs

- North Clackamas School District's High School Educational Specifications are complete.
- The MHS area program for the new building mirrors Ed Specs, with some customization based on school needs.
 - Classroom organization and use of extended learning areas
 - Teacher planning rooms
 - Minor Adjustments to Admin, SPED and Library areas.
- Limited ability to align commons building with Ed Specs due to size of existing building.

Bond Information

2016 CAPITAL CONSTRUCTION BOND

The Milwaukie High School and Lake Road Sports facilities are both enabled by the passage of the 2016 capital construction bond measure. With a passage rate of 62%, this measure will positively impact 17,324 students and our community through major facilities renovations, safety upgrades, and new construction.
